Tsuchi Bert

Winther-Tamaki,2022-05-31 An examination of Japanese contemporary art through the lens of ecocriticism and environmental history Collectively referred to by the word *tsuchi* earthy materials such as soil and clay are prolific in Japanese contemporary art Highlighting works of photography ceramics and installation art Bert Winther Tamaki explores the many aesthetic manifestations of *tsuchi* and their connection to the country's turbulent environmental history investigating how Japanese artists have continually sought a passionate and redemptive engagement with earth In the seven decades following 1955 Japan has experienced severe environmental degradation as a result of natural disasters industrial pollution and nuclear irradiation Artists have responded to these ongoing catastrophes through modes of mudlarking and muckracking utilizing raw elements from nature to establish deeper contact with the primal resources of their world and expose its unfettered contamination Providing a comparative assessment of more than seventy works of art this study reveals Japanese artists' engagement with a richly diverse repertoire of earthy materialities elucidating their aesthetic properties changing conditions and cultural significance By focusing on the role of *tsuchi* as a convergence point for a wide range of creative practices this book offers a critical reassessment of contemporary art in Japan and its intrinsic relationship to the environment Situating art within the context of ecology and urbanization *Tsuchi* shows artists striving to explore and reprocess raw forms of earth beneath the corruptions of human activity

Shapely Bodies Christine A. Jones,2013-05-16 *Shapely Bodies: The Image of Porcelain in Eighteenth Century France* constructs the first cultural history of porcelain making in France It takes its title from two types of bodies treated in this study the craft of porcelain making shaped clods of earth into a clay body to produce high end commodities and the French elite shaped human bodies into social subjects with the help of makeup stylish patterns and accessories These practices crossed paths in the work of artisans whose luxury objects reflected and also influenced the curves of fashion in the eighteenth century French artisans began trials to reproduce fine Chinese porcelain in the 1660s The challenge proved impossible until they found an essential ingredient kaolin in French soil in the 1760s *Shapely Bodies* differs from other studies of French porcelain in that it does not begin in the 1760s at the Sèvres manufactory when it became technically possible to produce fine porcelain in France but instead ends there Without the secret of Chinese porcelain artisans in France turned to radical forms of experimentation Over the first half of the eighteenth century they invented artificial alternatives to Chinese porcelain decorated them with French style and with equal determination shaped an identity for their new trade that distanced it from traditional guild crafts and aligned it with scientific invention The back story of porcelain making before kaolin provides a fascinating glimpse into the world of artisanal innovation and cultural mythmaking To write artificial porcelain into a history of real porcelain dominated by China Japan and Meissen in Saxony French porcelainiers learned to describe their new commodity in language that tapped into national pride and the mythic power of French *savoir faire* Artificial porcelain cut such a fashionable image that by the mid eighteenth century Louis XV appropriated it for the glory of the crown When the monarchy ended revolutionaries reclaimed

French porcelain the fruit of a century of artisanal labor for the Republic Tracking how the porcelain arts were depicted in documents and visual arts during one hundred years of experimentation Shapely Bodies reveals the politics behind the making of French porcelain s image Published by University of Delaware Press Distributed worldwide by Rutgers University Press Pottery, Glass & Brass Salesman ,1917 *The Cities and Cemeteries of Etruria* George Dennis,1878 Raku Firing Bill Jones,2009 Advanced techniques in raku firing covers production kiln construction glaze formulation tools and more **Description of a Collection of Japanese, Chinese and Korean Porcelain, Pottery and Faience** Frank Brinkley,1885 **The British Clayworker** ,1897 The Red-figure Pottery Sharon Herbert,1977 Inferior clays and glazes unsuited to the red figure style means that the indigenous production of red figure vases in Corinth was very limited However for about 75 years in the middle of the 5th century B C Corinthian potters tried to imitate the Athenian fashion and this book catalogues 186 pieces of their work The author discusses the reasons for the production of Corinthian red figure even in limited quantities Six painters are identified as responsible for at least half the known pieces Thirteen deposits provide chronological evidence to supplement that of the painting style The volume serves to bring forward a small but significant segment of the non Attic pottery industries and should stimulate interest in other unpublished unreported examples All items in the catalogue are illustrated in photographs line drawings are used to demonstrate details of technique
