Primates Comparative Anatomy And Taxonomy Vol 5 Cebidae Part B:

Pathology of Simian Primates, Part 2 R. N. Fiennes, 1972-04-24 Primate Evolution and Human Origins Russell L. Ciochon, 2017-09-08

Primate Evolution and Human Origins compiles for the first time the major ideas and publications that have shaped our current view of the evolutionary biology of the primates and the origin of the human line. Designed for freshmen to graduate students in anthropology, paleontology, and biology, the book is a unique collection of classic papers culled from the past 20 years of research. It is also an important reference for academicians and researchers as it covers the entire scope of primate and human evolution with an emphasis on the fossil record. A comprehensive bibliography cites over 2000 significant articles not found in the main text.

Primate Sexuality Alan F. Dixson, 1998

Primate Sexuality is a uniquely comprehensive synthesis of our knowledge about the sexual behaviour of primates. In it, Alan Dixson reviews and integrates both the evolutionary biology and the physiological basis of sexual behaviour across the whole spectrum of primates from prosimians to humans. Covering almost every aspect of primate sexuality, the book begins with an analysis of the history of research into primate sexual behaviour. Several chapters discuss the complex array of mating systems exhibited by primates and the bewildering range of tactics which influence sexual interactions within mating systems and ultimately reproductive success. Sex selection, sperm competition, and the evolution of sexual dimorphism are explored. The book also reviews our current knowledge of the physiological aspects of sexuality such as the sexual differentiation of the brain, hormonal mechanisms, the ovarian cycle, and the neuroendocrine regulation of sexual behaviour. No other book written on the subject of primate sexuality exhibits such comparative breadth or technical depth. Dixson has been working on primates for almost 30 years and has put together an outstanding volume drawing on and collating work spread across more than 2000 references. The work is illustrated throughout with hundreds of original drawings and figures. It will be welcomed by zoologists, anthropologists, and psychologists researching the sexual behaviour of primates as well as by psychiatrists and clinicians with an interest in human sexuality.

Primate Behavior Leonard A. Rosenblum, 2013-09-24

Primate Behavior: Developments in Field and Laboratory Research, Volume 4, examines developments in field and laboratory research on primate behavior. Topics range from facial expressions in nonhuman primates to the behavior and malnutrition in the rhesus monkey. The population structure and dynamics of the Borneo orang utan in relation to its ecology and reproductive strategy are also discussed, along with the social organization of *Macaca fascicularis*. Comprised of six chapters, this volume begins by discussing a field study that uses sound analysis to investigate the link between vocal pattern and social situation in the Japanese monkey *Macaca fuscata*. The next chapter focuses on one particular and very important means of visual communication in nonhuman primates: facial expressions. The behavior of marmoset monkeys, *Callithrix*, is then considered with emphasis on their social structure and social organization as well as patterns of social and sexual communication. The remaining chapters explore feeding behavior and malnutrition in the rhesus monkey, the population

structure and dynamics of the Borneo orang utan in relation to its ecology and reproductive strategy and the social organization and intergroup behavior of *Macaca fascicularis* This book should be of interest to biologists and primatologists

Primate Societies Barbara B. Smuts, Dorothy L. Cheney, Robert M. Seyfarth, Richard W. Wrangham, 2008-06-03 *Primate Societies* is a synthesis of the most current information on primate socioecology and its theoretical and empirical significance spanning the disciplines of behavioral biology ecology anthropology and psychology It is a very rich source of ideas about other taxa A superb synthesis of knowledge about the social lives of non human primates Alan Dixson *Nature*

Evolutionary History of the Primates Frederick S. Szalay, Eric Delson, 2013-10-22 *Evolutionary History of the Primates* presents a documentation and analysis of the fossil record and evolutionary history of the primates to facilitate the understanding of the genealogy adaptations dispersal and taxonomy of the order The book consists of 13 chapters each chapter is devoted to a specific genera or higher taxa of primates The chapters contain available information on the morphology relationships and adaptations of primate groups The book clarifies discussed points or documents interpretations and it indicates the type of fossil material available for each taxon The text will be valuable to many researchers and students who need a source of data and interpretations about fossil primates *Behavioral Primatology* A. M. Schrier, 2013-11-26

First published in 1977 The volume of research on nonhuman primates has expanded tremendously during the past 20 years and researchers familiarity with them has increased correspondingly This series of volumes deals with scientific studies of the behavior of nonhuman primates apes monkeys and prosimians The behavior of these animals is of course of interest in its own right But then so is that of the many other orders of animals Behavior of nonhuman primates is of special interest because these animals are more closely related to human beings structurally physiologically and beyond doubt behaviorally than are any other living animals **Faces in the Forest** Karen B. Strier, 1999 The woolly spider monkey or muriqui is one of the most threatened primate species in the world Because of deforestation in their natural habitat the muriquis are confined to less than 3 percent of their original range This book is a natural history of the muriqui from its scientific discovery in 1806 to its current highly endangered status **Bulletin** , 1968 **World Archaeoprimatology** Bernardo Urbani, Dionisios Youlatos, Andrzej T. Antczak, 2022-08-18 The first compendium of archaeoprimatological studies covering past relationships between humans and nonhuman primates across the world
