Letavec, Dennis Bolles, 2011 This handbook developed by the Project Management Institutes Program Management Office Specific Interest Group PMOSIG provides practical guidance to the project Management and PMO community on a variety of topics in the areas of PMO Strategic and Tactical Management PMO Governance PMO Services PMO Set up and Execution and PMO Performance and Maturity It features insightful contributions from more than 20 subject matter experts successful practitioners distinguished authors and thought leaders with a variety of backgrounds and experiences from around the World The authors include best practices and case studies for successfully aligning PMOs to business objectives and delivering benefits ROI as well as numerous proven tools templates policies procedures standards methodologies and processes for successfully developing and managing PMOs and for expanding their scope of services *Innovating for Sustainability* Luca Berchicci, 2008-09-03 One of the challenges met by green entrepreneurs and product developers who have tried to develop more sustainable products is that efforts to have better products in environmental terms do not always translate into effective business cases The purpose of this book is a better understanding of the implications of environmental issues in new product development Through an empirical study in the human powered vehicle sector Luca Berchicci examines how and to what extent the environmental ambition of product developers and managers influences the way new products and services are developed The understanding of this phenomenon is particularly important since managers are encouraged and or motivated to undertake environmental new product development projects From the descriptions and analyses of the two cases study Luca Berchicci suggests that a high level of environmental ambition increases the complexity of the product innovation process Moreover a high level of environmental ambition may hamper a product innovation process because it may lead the developers away from the market that their product is to serve Accordingly this book attempts to explain and predict how environmental ambition influences new product development processes This claim provides a theoretical contribution to existing research in both product innovation and green product innovation Moreover this book provides an original and deep insight on the diverse facets of greening **Managing Sustainable Development Programmes** Gran Brulin, Lennart Svensson, 2016-05-13 Project work driven by competent project leaders drives positive outcomes Unfortunately these optimistic initial results are often short sighted with few evaluations of their long term impact The research contained in *Managing Sustainable Development Programmes* reveals an extraordinary level of failure in the durability of large change programmes and projects in both the private and public sectors In this book the authors question whether sustainable development be achieved within the framework of large publicly financed programmes This strong critique of traditional programme implementation overturns much of our current thinking about project delivery and governance The authors focus instead on sustainable change and development They show how active ownership and collaboration between different actors and the dynamics of developmental learning can be used to create programmes and

projects that contribute to innovation employment and growth in a way that favours companies employees customers and society in a broader sense The message at its heart is don t blame the project leader but rather look for dynamic possession of projects joint knowledge management and sharing with external stakeholders that will secure long term effects
