Radioisotope Experiments in High School Biology Evelyn M. Hurlburt, 1966 Special Sources of Information on Isotopes F. E. McKinney, 1968 **Methods of Animal Experimentation** William I. Gay, 2013-09-12 Methods of Animal Experimentation Volume II provides information on the most common methods for using animals as tools in the search for new biological knowledge The techniques described will facilitate the most efficient use of research animals and provide guidelines for their utmost comfort and welfare The text is arranged according to specific research methods rather than to organ system or disease category This approach gives the reader a broad view of the techniques involved in specific fields and describes the range of usefulness of these techniques The chapters in the present volume deal with special techniques which have been demonstrated to be distinct useful methods for using laboratory animals as a basic biomedical research tool The descriptions of both fundamental and well developed techniques of animal experimentation in various research fields should be useful to graduate students and experienced scientists who must consider variations in research approaches The book is a source of information for the scientist administrator who is frequently confronted with different proposed approaches to biological research projects utilizing animals

Manganese in Soils and Plants R.D. Graham, R.J. Hannam, N.C. Uren, 2012-12-06 Sixty years ago at the Waite Agricultural Research Institute G Samuel a plant pathologist and C S Piper a chemist published their conclusion that the cause of roadside take all a disease of oats was manganese deficiency This report together with the concurrent and independent studies of W M Carne in Western Australia were the first records of manganese deficiency in Australia and came only six years after McHargue's paper which is generally accepted as the final proof of the essentiality of this element There must have been a few doubts for some people at the time however as the CAB publication *The Minor Elements of the Soil* 1940 expressed the view that further evidence to this effect was provided by Samuel and Piper Their historic contributions are recognised by the International Symposium on Manganese in Soils and Plants as it meets on the site of their early labours to celebrate the 60th anniversary This year Australians also acknowledge 200 years of European settlement in this country and so the Symposium is both a Bicentennial and a diamond jubilee event which recognises the impact of trace elements on agricultural development in Australia In a broader sense a symposium such as this celebrates as it reviews the efforts of all who over the ages have contributed to our knowledge of manganese in soils and plants

Ecological Methods T.R. Southwood, 2013-06-29 The virtual impossibility of extracting the many different species from a habitat with equal efficiency by a single method e.g. Nef 1960 1 1 Population estimates Population estimates can be classified into a number of different types the most convenient classification is that adopted by Morris 1955 although he used the terms somewhat differently in a later paper 1960 1 1 1 Absolute and related estimates The animal numbers may be expressed as a density per unit area of the ground of the habitat Such estimates are given by nearest neighbour and related techniques Chapter 2 marking and recapture Chapter 3 by sampling a known fraction of the habitat Chapter 4 6 and by removal sampling and random walk techniques Chapter 7 Absolute population The number of animals per unit area e.g. hectare acre It is almost impossible to construct a budget or to study mortality factors without the conversion of population estimates to absolute figures for not only do insects often move from the plant to the soil at

different developmental stages but the amount of plant material is itself always changing The importance of obtaining absolute estimates cannot be overemphasized Source Book of Educational Materials for Nuclear Medicine ,1981

Current Catalog National Library of Medicine (U.S.),1992 Radioecological Concentration Processes Bertil Åberg, Frank P. Hungate, 2013-10-22 Radioecological Concentration Processes present the overall model for problems of environmental contamination in terms of system analysis This book discusses the major investigational approaches to study of environmental contamination with radioactivity Organized into 90 chapters this book starts with an overview of the results of the experimental investigations into the distribution of strontium in soils and the uptake of this nuclide by plants This text then presents the comparison of the distribution character in different soil types which shows clearly that ploughed soils differ from virgin soils by a more uniform and similar character of radioisotope distribution in them Other chapters consider the migration of ^{90}Sr in the mostly podzolic and water logged soils of moderately northern latitudes of Russia The final chapter deals with the experiments with the shore crab *Carcinus maenas* which shows that the crab is able to regulate the zinc content of its body against changes in the zinc content of food or of surrounding water Biochemists will find this book useful **Nuclear and Radiochemistry, 2 Volume Set** Jens-Volker Kratz, Karl Heinrich Lieser, 2013-12-04 The third edition of this classic in the field is completely updated and revised with approximately 30% new content so as to include the latest developments The handbook and ready reference comprehensively covers nuclear and radiochemistry in a well structured and readily accessible manner dealing with the theory and fundamentals in the first half followed by chapters devoted to such specific topics as nuclear energy and reactors radiotracers and radionuclides in the life sciences The result is a valuable resource for both newcomers as well as established scientists in the field **New Scientist** ,1969 *Quality Technology Handbook* R S Sharpe, J West, D S Dean, 2017-03-28 *Quality Technology Handbook* Fourth Edition offers a wide discussion on technology and its related subtopics After giving some information on its background content and authors the book then informs the readers about the quality problem check list and enumerates the questions one has to ask to ensure that a problem will be solved This part is followed by a discussion on non destructive testing NDT and the several committees formed for it among which are the British National Committee and the Harwell NDT Center The book also includes information on two organizations that are closely related to the topic the Institute of Quality Assurance IQA and The Welding Institute TWI A directory of international organizations related to quality assurance and non destructive testing is provided in the latter part of the text The book serves as valuable reference to undergraduates or postgraduates of courses that are related to science and technology **Fundamentals of Radiochemistry** Jean-Pierre Adloff, 2018-01-18 *Fundamentals of Radiochemistry* presents a comprehensive overview of the principles objectives and methods of radiochemistry and how they are applied in various fields of chemistry Topics covered include characteristics of radioactivity and radioactive matter the chemistry of ephemeral radionuclides actinides of high atomic number positronium and physicochemical behavior of systems

containing one or more compounds at tracer or sub tracer concentration Numerous appendices are included to provide additional detail to information presented in chapters Because Fundamentals of Radiochemistry is the first book to discuss what chemical information can be obtained with sub tracer amounts it is essential reading for inorganic chemists radiochemists analytical chemists nuclear chemists and others interested in the topic
