Skies John E. Thornes,John Constable,1999-01-01 John Constable is arguably the most accomplished painter of English skies and weather of all time For Constable the sky was the keynote the standard of scale and the chief organ of sentiment in a landscape painting But how far did he understand the workings of the forces of nature which created his favourite cumulus clouds portrayed in so many of his skies over the landscapes of Hampstead Heath Salisbury and Suffolk And were the skies he painted scientifically accurate In this lucid and accessible study John Thornes provides a meteorological framework for reading the skies of landscape art compares Constable s skies to those produced by other artists from the middle ages to the nineteenth century analyses Constable s own meteorological understanding and examines the development of his painted skies In so doing he provides fresh evidence to identify the year of painting of some of Constable s previously undated cloud studies **Weather Lore** ,1898 **The Rainbow Bridge** Raymond L. rainbow s image is woven into the fabric of our past and present From antiquity to the nineteenth century the rainbow has played a vital role in both inspiring and testing new ideas about the physical world Although scientists today understand the rainbow s underlying optics fairly well its subtle variability in nature has yet to be fully explained Throughout history the

rainbow has been seen primarily as a symbol of peace covenant or divine sanction rather than as a natural phenomenon Lee and Fraser discuss the role the rainbow has played in societies throughout the ages contrasting its guises as a sign of optimism bearer of Greek gods messages of war and retribution and a symbol of the Judeo Christian bridge to the divine The authors traverse the bridges between the rainbow s various roles as they explore its scientific artistic and folkloric visions This unique book exploring the rainbow from the perspectives of atmospheric optics art history color theory and mythology will inspire readers to gaze at the rainbow anew For more information on The Rainbow Bridge visit [Journal of the Franklin Institute](#) ,1919 Vols 1 69 include more or less complete patent reports of the U S Patent Office for years 1825 1859 cf Index to v 1 120 of the Journal p 415 **Uncle Robert's visit** Francis Wayland Parker,1897 **Introductory Meteorology** National Research Council (U.S.).
