Redefining Linguistics:

Redefining Linguistics (RLE Linguistics A: General Linguistics) Hayley G. Davis, Talbot J. Taylor, 2014-02-03 The academic discipline of linguistics is at a critical stage of development. Whatever consensus there may have been fifteen or even ten years ago is fast disappearing. A process of redefinition is underway and it is the aim of this volume to contribute to that process: explain why a redefinition is needed and how it should proceed. In the case of linguistics the subject is also the subject matter. Many linguists have ignored the problem of definition simply regarding linguistics as the science of language itself. What though is language itself? Is it a language i.e. English, Swahili? Or language in a more general sense? The primary goal of a redefinition of linguistics should be to demonstrate that language is not an objective matter. Linguistics is and should be the study of whatever is linguistically pertinent. A linguistics redefined would look at how we interpret and construct our day to day communication acts, what views of language are shared by and opposed by societies and the source and roles that these views play in our living and learning experience. These papers argue the case for such a redefinition more explicitly than has ever been done before in modern linguistic theory. Such a redefined perspective precisely because it is a perspective subject to outside influence and in constant dialogue with the perspective of the other human sciences must be endlessly redefined.

Rethinking Linguistics Hayley G. Davis, Talbot J. Taylor, 2003-09-02 Rethinks the aims and methods of contemporary linguistics. Uses integrationist theory to exemplify how language users become language makers.

Redefining Linguistics Hayley G. Davis, Talbot J. Taylor, 1990 **Sociolinguistics** Nikolas Coupland, 2016-06-20 Sociolinguistics is a dynamic field of research that explains the role and function of language in social life. This book offers the most substantial account available of the core contemporary ideas and arguments in sociolinguistics with an emphasis on innovation and change. Bringing together original writing by more than twenty of the field's most influential international thinkers and researchers, this is an indispensable guide to the newest and most searching ideas about language in society. For researchers and advanced students it gives access to the field's most pressing issues and debates as well as providing a platform for new initiatives in sociolinguistic research.

The New Psychology of Language Michael Tomasello, 2017-07-05 This book which gathers in one place the theories of 10 leading cognitive and functional linguists represents a new approach that may define the next era in the history of psychology. It promises to give psychologists a new appreciation of what this variety of linguistics can offer their study of language and communication. In addition it provides cognitive functional linguists new models for presenting their work to audiences outside the boundaries of traditional linguistics. Thus it serves as an excellent text for courses in psycholinguistics and appeal to students and researchers in cognitive science and functional linguistics.

The Reflexivity of Language and Linguistic Inquiry Dorthe Duncker, 2018-11-09 This book explores the reflexivity of language both from the perspective of the lay speaker and the linguistic analyst. Linguistic inquiry is conditional upon linguistic reflexivity but so is language. Without linguistic reflexivity

we would not be able to make sense of everyday linguistic communication and the idea of a language would not be conceivable Not even fundamental notions such as words or meaning would exist Linguistic reflexivity is a feature of the communication process and it essentially depends on situated participants and time It is a defining characteristic of the human language but despite its obvious importance it is not very well understood theoretically and it is strangely under researched empirically Throughout history and in modern linguistics it has mostly either been taken for granted misconstrued or ignored Only integrational linguistics fully recognizes its specifically linguistic implications However integrational linguistics does not provide the necessary methodological basis for investigating linguistic phenomena empirically This catch 22 situation means that the goal of the book is twofold one part is to explore the reflexivity of language theoretically and the other part is to propose an applied integrational linguistics and to implement this proposal in practice

Expanding the Linguistic Landscape Martin Pütz, Neele-Frederike Mundt, 2018-12-20 This book provides a forum for theoretical methodological and empirical contributions to research on language s multimodality and public space which will advance new ways of understanding the sociocultural ideological and historical role of communication practices and experienced lives in a globalised world Linguistic Landscape is viewed as a metaphor and expanded to include a wide variety of discursive modalities imagery non verbal communication silence tactile and aural communication graffiti smell etc The chapters in this book cover a range of geographical locations and capture the history motives uses causes ideologies communication practices and conflicts of diverse forms of languages as they may be observed in public spaces of the physical environment The book is anchored in a variety of theories methodologies and frameworks from economics politics and sociology to linguistics and applied linguistics literacy and education cultural geography and human rights

Doerr,2024-10-21 Language standardization is problematic because it imposes the dominant group's linguistic variety as the only correct one and promotes the idea of unit thinking i.e. seeing the world as consisting of bounded internally homogeneous units This volume examines intentional practices to subvert such processes of language standardization what we call counter standardization practices in language education and other contexts By suggesting alternative classroom pedagogies language reclamation processes for indigenous populations and discourses about mispronunciation this volume explores more liberatory approaches the post unit thinking of language
