KERA has other components such as the ungraded primary program This book presents findings from the second phase of the 10 year study focusing on the effects of KERA on curriculum instruction and student learning in six elementary schools in the four districts In all six schools student achievement improved but in five schools teachers focused more on improving whole school performance on achievement measures than on improving the learning of each student and had difficulty raising their expectations for low income and minority children KERA reforms increased classroom writing the variety of instructional strategies integration of subject matter classroom computer use and open ended response and portfolio items for classroom assessment However teachers had difficulty moving beyond a teacher directed approach and only a few integrated technology effectively into the curriculum Testing for accountability became the focus of the assessment system and the KERA goal of continuous performance based student evaluation was neglected School based decision making councils did not make most key decisions as intended by KERA The findings also note the importance of school leadership accountability goals and the need for more time for teachers in meeting school professional development Ten appendices present KERA goals dissemination efforts data collection and research questions for both phases of the study interview protocols and characteristics of parents students and community members interviewed Contains 151 references TD
