## **Reduced Worktime And The Management Of Production:**

*Reduced Worktime and the Management of Production* Chris Nyland, 1989      Capitalism and the Political Economy of Work Time Christoph Hermann, 2014-10-17 John Maynard Keynes expected that around the year 2030 people would only work 15 hours a week In the mid 1960s Jean Fourasti still anticipated the introduction of the 30 hour week in the year 2000 when productivity would continue to grow at an established pace Productivity growth slowed down somewhat in the 1970s and 1980s but rebounded in the 1990s with the spread of new information and communication technologies The knowledge economy however did not bring about a jobless future or a world without work as some scholars had predicted With few exceptions work hours of full time employees have hardly fallen in the advanced capitalist countries in the last three decades while in a number of countries they have actually increased since the 1980s This book takes the persistence of long work hours as starting point to investigate the relationship between capitalism and work time It does so by discussing major theoretical schools and their explanations for the length and distribution of work hours as well as tracing major changes in production and reproduction systems and analyzing their consequences for work hours Furthermore this volume explores the struggle for shorter work hours starting from the introduction of the ten hour work day in the nineteenth century to the introduction of the 35 hour week in France and Germany at the end of the twentieth century However the book also shows how neoliberalism has eroded collective work time regulations and resulted in an increase and polarization of work hours since the 1980s Finally the book argues that shorter work hours not only means more free time for workers but also reduces inequality and improves human and ecological sustainability      *Work Less* Jon Peirce, 2024-01-02 You can't have a healthy economy with an unhealthy work force *Work Less* proposes ways to reduce work hours and keep workers happier healthier and more productive Recent years have revealed just how stressed out many workers are While the trend to longer hours has been developing for several decades the trend's effects have been aggravated during the pandemic by the growing use of Zoom and other new technologies for meetings with clients customers and co workers Exhausted and fed up today's workers are starting to insist on shorter hours and greater flexibility as to where they do their work There is growing consensus that the forty hour week the norm since the 1940s has outlived its usefulness And there is an urgent need for new work schedules that adequately reflect the far greater intensity of work today as well as the greater family demands on a labour force made up of almost fifty percent women who bear the brunt of domestic duties *Work Less* offers practical scheduling suggestions to employers and workers and numerous policy options for government policy makers to improve working conditions      **The Overworked American** Juliet Schor, 2008-08-05 This pathbreaking book explains why contrary to all expectations Americans are working harder than ever Juliet Schor presents the astonishing news that over the past twenty years our working hours have increased by the equivalent of one month per year a dramatic spurt that has hit everybody men and women professionals as well as low paid workers Why are we unlike every other industrialized Western nation repeatedly choosing
