Reducing the Odds National Research Council, Board on Children, Youth, and Families, Institute of Medicine, Committee on Perinatal Transmission of HIV, 1999-02-13 Thousands of HIV positive women give birth every year Further because many pregnant women are not tested for HIV and therefore do not receive treatment the number of children born with HIV is still unacceptably high What can we do to eliminate this tragic and costly inheritance In response to a congressional request this book evaluates the extent to which state efforts have been effective in reducing the perinatal transmission of HIV The committee recommends that testing HIV be a routine part of prenatal care and that health care providers notify women that HIV testing is part of the usual array of prenatal tests and that they have an opportunity to refuse the HIV test This approach could help both reduce the number of pediatric AIDS cases and improve treatment for mothers with AIDS Reducing the Odds will be of special interest to federal state and local health policymakers prenatal care providers maternal and child health specialists public health practitioners and advocates for HIV AIDS patients January

**Public Financing and Delivery of HIV/AIDS Care** Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on the Public Financing and Delivery of HIV Care, 2005-11-04 Each year it is estimated that approximately 40 000 people in the U S are newly infected with HIV In the late 1990s the number of deaths from AIDS dropped 43% as a result of highly active antiretroviral therapy Unfortunately the complex system currently in place for financing and delivering publicly financed HIV care undermines the significant advances that have been made in the development of new technologies to treat it Many HIV patients experience delays in access to other services that would support adhering to treatment As a result each year opportunities are missed that could reduce the mortality morbidity and disability suffered by individuals with HIV infections Public Financing and Delivery of HIV AIDS Care examines the current standard of care for HIV patients and assesses the extent the system currently used for financing and delivering care allows individuals with HIV to actually receive it The book recommends an expanded federal program for the treatment of individuals with HIV administered at the state level This program would provide timely access and consistent benefits with a

strong focus on comprehensive and continuous care and access to antiretroviral therapy It could help improve the quality of life of HIV AIDS patients as well as reduce the number of deaths among those infected **Morbidity and Mortality**

**HIV Care** Steven L. Zeichner,Jennifer S. Read,2005-04-28 This comprehensive textbook provides the definitive account of effective care for pediatric HIV patients Drawing on the massive and burgeoning published literature from a wide range of sources this volume summarises a wealth of information concerning the aetiology of the disease and the best clinical care for this vulnerable group It distils the very latest knowledge of virology immunology and pathogenesis and uses this to illuminate and explain management recommendations Recently many new agents for the treatment and prophylaxis of HIV infection and the opportunistic infections that accompany HIV infection have been developed accompanied by many new ways of monitoring HIV infection in children These new therapies and approaches to management are complicated but the long term health of HIV infected children depends on their meticulously correct application This textbook explains helps and guides the clinician through all these complexities to facilitate the best possible care for children with HIV infection **No Time to**

**Lose** Institute of Medicine,Division of Health Promotion and Disease Prevention,Committee on HIV Prevention Strategies in the United States,2001-03-02 The United States has spent two productive decades implementing a variety of prevention programs While these efforts have slowed the rate of infection challenges remain The United States must refocus its efforts to contain the spread of HIV and AIDS in a way that would prevent as many new HIV infections as possible No Time to Lose presents the Institute of Medicine s framework for a national prevention strategy **Quantitative Evaluation of HIV**

**Prevention Programs** Edward H. Kaplan,Ron Brookmeyer,2008-10-01 How successful are HIV prevention programs Which HIV prevention programs are most cost effective Which programs are worth expanding and which should be abandoned altogether This book addresses the quantitative evaluation of HIV prevention programs assessing for the first time several

different quantitative methods of evaluation The authors of the book include behavioral scientists biologists economists epidemiologists health service researchers operations researchers policy makers and statisticians They present a wide variety of perspectives on the subject including an overview of HIV prevention programs in developing countries economic analyses that address questions of cost effectiveness and resource allocation case studies such as Israel s ban on Ethiopian blood donors and descriptions of new methodologies and problems

**Lethal Decisions** Arthur J. Ammann, 2021-04-30 This first person account by one of the pioneers of HIV AIDS research chronicles the interaction among the pediatric HIV AIDS community regulatory bodies governments and activists over more than three decades After the discovery of AIDS in a handful of infants in 1981 the next fifteen years showed remarkable scientific progress in prevention and treatment although blood banks drug companies and bureaucrats were often slow to act 1996 was a watershed year when scientific and clinical HIV experts called for treating all HIV infected individuals with potent triple combinations of antiretroviral drugs that had been proven effective Aggressive implementation of prevention and treatment in the United States led to marked declines in the number of HIV related deaths fewer new infections and hospital visits and fewer than one hundred infants born infected each year Inexplicably the World Health Organization recommended withholding treatment for the majority of HIV infected individuals in poor countries and clinical researchers embarked on studies to evaluate inferior treatment approaches even while the pandemic continued to claim the lives of millions of women and children Why did it take an additional twenty years for international health organizations to recommend the treatment and prevention measures that had had such a profound impact on the pandemic in wealthy countries The surprising answers are likely to be debated by medical historians and ethicists At last in 2015 came a universal call for treating all HIV infected individuals with triple combination antiretroviral drugs But this can only be accomplished if the mistakes of the past are rectified The book ends with recommendations on how the pediatric HIV AIDS epidemic can finally be brought to an end

**The New Public Health and STD/HIV Prevention** Sevgi O. Aral, Kevin A. Fenton, Judith A. Lipshutz, 2012-12-09 Despite effective approaches to prevention STD and HIV infection rates remain fairly constant Targeting implementation and monitoring of interventions have posed widespread problems and the recent spate of cuts to prevention budgets has made these roadblocks even more challenging It is clear that working in sexual health requires both a deeper understanding of STI HIV epidemiology and an ongoing quest for up to date realistic prevention strategies The New Public Health and STD HIV Prevention offers readers leading edge access to both Focusing on social determinants of sexual health at risk populations critical factors in approaches to prevention and reviews of new research this authoritative volume explores areas as varied as HPV prevention technology based interventions migration as a factor in disease transmission and competencies key to effective leadership in the field Dispatches from the frontlines of theory research and practice in the U S and abroad include Personal risk public impact balancing individual rights and STD HIV prevention Distribution of prevention resources and its impact on sexual

health Prevention measures in diverse populations of women Toward a better approach to preventive interventions with men who have sex with men Adolescent sexual health and STIs Reducing disparities in sexual health lessons from the campaign to eliminate infectious syphilis Public health professionals of all backgrounds interested in or working in improving sexual health will find *The New Public Health and STD HIV Prevention* an indispensable guide to conceptualizing the problems and clarifying possible solutions      **Blaming Mothers** Linda C. Fentiman, 2017-03-14 Presentation de l'auteur In the past several decades medicine the media and popular culture have focused on mothers as the primary source of health risk for their children even though American children are healthier than ever The American legal system both reflects and reinforces this conception of risk This book explores how this occurs by looking at unconscious psychological processes including the ways in which we perceive risk which shape the actions of key legal decisionmakers including prosecutors judges and jurors These psychological processes inevitably distort the way that ostensibly neutral legal principles are applied in ways that are biased against mothers The book shows how assertions that mothers and mothers to be have risked their children's health play out in practice Pregnant women women who do or do not breastfeed and mothers whose children are injured or killed by the mother's abusive male partner end up facing civil lawsuits and criminal prosecution The book also illustrates how America's resistance to the precautionary principle has led to an epidemic of children poisoned by lead Vaccination is the only area in which parents are permitted to opt out of medically recommended health care for their children The book explores the role of choice in children's health and how it is applied unevenly to mothers and others including manufacturers of toxic products The book ends with recommendations for real improvement in children's health      *Handbook of Pediatric HIV Care* Steven L. Zeichner, Jennifer S. Read, 2006-05-04 This portable and practical handbook first published in 2006 provides a concise guide to the essentials of pediatric HIV care in a form suitable for doctors in the busy hospital setting During recent years many agents for the treatment and prophylaxis of HIV infection and the opportunistic infections that accompany HIV infection have been developed and many new ways of monitoring HIV infection in children have been produced These therapies and approaches to management are complicated but the long term health of HIV infected children depends on their correct application This handbook presents the core information and guidelines necessary for effective management of infected children Two other important themes are ways to minimise mother to infant transmission and the challenges of looking after these children in resource poor countries      Novick and Morrow's Public Health Administration James A. Johnson, Leiyu Shi, 2013-07-12 Under the direction of new lead editors Leiyu Shi and James Johnson the new Third Edition of *Public Health Administration* examines the many events advances and challenges in the U S and the world since the publication of the last edition of the book Important Notice The digital edition of this book is missing some of the images or content found in the physical edition      Obstetric Medicine Shital Gandhi, Dan Farine, 2022-02-07 The subspecialty of Obstetric Medicine sits in a unique intersection of the disciplines of Internal Medicine and Obstetrics Its focus is in the

skilled management of medical problems in pregnancy from pre pregnancy optimization to the management of acute and chronic conditions in pregnancy and in the postpartum period to ensure resolution and safe transition back to the primary care provider This book will provide novel insights into the management of pregnant women Clinical pearls will be emphasized such as illustrating atypical aspects of a presenting symptom finding and when a subspecialty referral or transfer to a high risk centre must occur for patient safety This book will combine basic science principles build on existing guidelines and provide crucial tips on how to safely manage acute and chronic medical conditions in pregnancy It is THE book for sub specialists in Obstetric Medicine      *AIDS and the Law* Skinner-Thompson, Scott, 2015-12-18 AIDS and the Law provides comprehensive coverage of the complex legal issues as well as the underlying medical and scientific issues surrounding the HIV epidemic Covering a broad range of legal fields from employment to health care to housing and privacy rights this essential resource provides thorough up to date coverage of a rapidly changing area of law The Fifth Edition of AIDS and the Law has been updated to include Updates regarding medical advancements in treating and preventing HIV including pre exposure prophylaxis PrEP Analysis of the FDA s revised recommendations for blood donations from men who have sex with men Synthesized and streamlined analysis of the Americans with Disabilities Act and the ADA Amendments Act of 2008 Comprehensive discussion of housing protections for people living with HIV Updates regarding the National HIV AIDS Strategy including the revised Strategy released in 2015 Important developments regarding the U S government s treatment of HIV positive immigrants Discussion of the Affordable Care Act s anti discrimination provisions for people living with HIV Overview of new international and foreign protections for people living with HIV Information on navigating the many public benefit regimes potentially available to people living with HIV Detailed discussion regarding protections for prisoners living with HIV including new case law forbidding segregation
