Reenchantment Of Nature:

The Reenchantment of Nature Alister McGrath, 2002-09-17 In this provocative assessment of the world's current ecological crisis the author of the critically acclaimed *In the Beginning* exposes the false assumptions underlying the conflicts between science and religion and proposes an innovative approach to saving the planet. Traditionally science and religion have been thought of as two distinct and irreconcilable ways of looking at the world and scientists have often chastised the world's religions for keeping their eyes on the heavens and paying scant attention to the destruction of Earth's precious resources and its natural wonders. In *The Reenchantment of Nature* Alister McGrath, who holds doctorates in both molecular biology and divinity, challenges this long-held and dangerously misguided dichotomy. Arguing that Christianity and other great religions have always respected and revered the bounty and beauty of the earth, McGrath calls for a radical shift in perspective. He shows that by defining the world in the narrowest of scientific terms and viewing it as a collection of atoms and molecules governed by unchanging laws and forces, we have lost our ability to appreciate nature's enchantments. In order to address the threats to our environment, he maintains, it is essential to reawaken our sense of awe and look at the world as a glorious creation, an irreplaceable gift of God. In setting forth a new framework for the debate between science and religion on ecological theory, *The Reenchantment of Nature* points the way to integrating two different traditions in a sane and productive effort to rescue the natural world from its present environmental decline.

The Reenchantment of the World Morris Berman, 1981 Morris Berman's book addresses what I consider to be the most important topic at our present moment in history. He is searching for the underpinnings of a new world view that can give rise to a culture capable of relating gently and self-sustainingly to the earth. Frederick Ferr, *The Reenchantment of the World* is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy. Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it, Berman shows how science acquired its controlling position in the consciousness of the West. He analyzes the holistic animistic tradition destroyed in the wake of the Scientific Revolution of the sixteenth and seventeenth centuries, which viewed man as a participant in the cosmos, not as an isolated observer. Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment, he explores the possibilities for a consciousness appropriate to the modern era. Ecological rather than animistic, this new world view would be grounded in the real and intimate connection between man and nature.

The Physicists' View of Nature, Part 1 Amit Goswami, 2012-12-06 This book is designed as a textbook for students who need to fulfil their science requirements. Part I explores classical physics from its beginnings with Descartes, Galileo, Kepler, and Newton to the relativity theories of Einstein. Special emphasis is given to the development of the objective materialist and deterministic worldview of classical physics. The influence of Newtonian physics on other fields of science and on society is emphasized. Finally, some of the problems with the worldview of classical physics are discussed, and a preview of quantum physics is given.

They also explore the significance of adopting a reenchanted perspective for debates on major concepts such as nature naturalism God ontology and disenchantment Taken together they demonstrate that there is much to be gained from working with a more substantial and affirmative concept of reenchanted understood as a fundamental existential orientation towards what is seen as meaningful and of value The Philosophy of Reenchantment will be of interest to scholars and advanced students in philosophy especially those working in moral philosophy metaphysics philosophy of religion theology religious studies and sociology

Remaking Reality Bruce Braun, Noel Castree, 2005-08-08 This book rejects apocalyptic pronouncements that the end of the millennium represents the end of nature as well Remaking Reality brings together contributors from across the human sciences who argue that a notion of social nature provides great hope for the future Applying a variety of theoretical approaches to social nature and engaging with debates in politics science technology and social movements surrounding race gender and class the contributors explore important and emerging sites where nature is now being remade with considerable social and ecological consequences The essays are organised around two themes capitalising and envisioning nature and actors networks and the politics of hybridity An afterword by Neil Smith reflects on the problems and possibilities of future names For critics and activists alike Remaking Reality provides essential theoretical and political tools to rethink environmentalism and progressive social natures for the twenty first century

The Spirit of Creation Amos Yong, 2011-05-17 Is a pentecostal charismatic worldview defensible in light of contemporary science In The Spirit of Creation Amos Yong demonstrates that pentecostal thought does indeed have merit in scientific contexts What's more he argues that pentecostal charismatic views regarding the dynamic presence and activity of the Spirit of God and the pluralistic cosmology of many spirits have something important to add to the broad discussion now taking place at the crossroads of science and religion Interacting with many scientific fields of study including psychology sociology evolutionary science cosmology and more Yong's Spirit of Creation demonstrates the significance of pentecostal ideas to the ongoing dialogue between theology and science

Reenchantment Jeffrey Paine, 2004-11-02 The colorful tale of the successful flowering of an obscure ancient Eastern sect in the modern world In a single generation Tibetan Buddhism developed from the faith of a remote mountain people associated with bizarre almost medieval superstitions to perhaps the most rapidly growing and celebrity studded religion in the West Disaffected with other religious traditions yet searching for meaning huge numbers of Americans have found their way to the wisdom of Tibetan lamas in exile Earthy humorous commonsensical and eccentric these flamboyant teachers larger than life characters like Lama Yeshe and Chogyam Trungpa proved to be charismatic and gifted ambassadors for their ancient religion So did two Western women born in Brooklyn and London's East End whose homegrown religious intuitions turned out to be identical with the most sophisticated Tibetan teachings revealing them to be reincarnated lamas With great flair for both the sublime and the human Jeffrey Paine narrates in page turning richly informative fashion how Tibetan Buddhism rarefied and sensual mystical and commonsensical became the ideal

religion for a post religious age By far the best of the recent popular books exploring the amazing impact of Tibetan Buddhism Paine s witty erudite flowing prose creates a memorable album of many characters saints rascals and ordinary folks He glosses over nothing is ruthlessly critical where it is deserved but is also secure enough to appreciate the beauty and the power of the magic and mystery the profound practical wisdom and compassion of Tibetan civilization gone global Robert Thurman Jey Tsong Khapa Professor of Indo Tibetan Buddhist Studies Columbia University Riveting Recounts elegantly yet without fuss stories of human transformation that consistently incite our capacity for wonder Askold Melnyczuk Boston Globe Memorable anecdotes great storytelling and keen observations mark this cogent exploration of the explosive growth of Tibetan Buddhism in the West Publishers Weekly starred review Downwind of the Atomic State James C. Rice,2023-03-07 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health Downwind of the Atomic State focuses on the key decisions and events shaping the Commission s mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science The Problem of Perception and the Experience of God Sameer Yadav,2015-06-01 Sameer Yadav s central claim in this work is that there is a radical mistake in many contemporary accounts that require grounding a theological story of God s availability to us in experience in a prior general philosophical theory of perception Instead it is argued that the philosophical problem of perception is a pseudoproblem The study concludes with a new reading of Gregory of Nyssa and his theology of the spiritual senses which is free from the bewitchment of the problem of perception

Grounding God Arianne Conty,2023-12-01 Now that we have entered the Anthropocene the geological age in which humans have altered the natural world to such an extent that nature and culture can no longer be separated the modern dichotomies of mind versus body and culture versus nature have become implausible and need to be replaced In Grounding

God Arianne Conty argues that it is in the field of religion where we can find a new ontology better suited for the Anthropocene Conty calls this new religious ontology the grounding of the sacred in that it seeks to deconstruct the binaries of modernity and provide in their place a revalorization of the immanent earth and the more than human beings that inhabit it Such a grounding of the sacred is a potent means to overcome the exploitation and desecration of the earth and its nonhuman beings and to provide in its stead an inclusive cosmopolitics that extends mind into matter and culture into nature Tracing such a grounding in the Christian Buddhist neopagan and animist traditions Conty seeks to elaborate an interdisciplinary ecosophy one that uses philosophy anthropology and religious studies to provide new values for the present age

Rethinking Green Politics John Barry, 1999-02-22 Winner of the PSA Mackenzie Prize for best politics book of 1999 Rethinking Green Politics offers a wide ranging overview and critical analysis of the theoretical framework that underpins the values principles and concerns of contemporary green politics and the appropriate institutional means for realizing green ends

Climate, God and Uncertainty Arthur C. Petersen, 2023-11-28 Climate God and Uncertainty moves beyond Bruno Latour's thought to understand what climate change means for philosophical anthropology and wider culture What are for example the philosophical implications of climate change and its associated uncertainties Referring mainly to works by Latour William James and Heinrich Rickert Petersen develops transcendental naturalism to reinterpret the interface between science and politics in the context of climate change He highlights for instance issues such as the religious disenchantment of nature the scientific disbelief in a plurality of value laden perspectives and the disregard for non modern worldviews in politics In developing its argument the book makes a methodological intervention on the sort of naturalism that guides both Latour's work and a large part of the academic field called science and religion Praise for Climate God and Uncertainty The challenges of a changing climate raise disturbing questions about being human in the world ones that cannot adequately be answered through scientific inquiry In this original interrogation and extension of the work of Bruno Latour Petersen constructs a philosophical position that takes seriously the realities of a changing natural world the human search to ground our sense of value and the possibility of God Climate God and Uncertainty is an exciting new addition to the small but growing literature on climate change religion and philosophy Mike Hulme University of Cambridge This innovative and exciting work explores the rich potential of transcendental naturalism as a bridge between science and religion Drawing on the work of William James Heinrich Rickert and Bruno Latour Petersen maps out a fresh approach that goes beyond current accounts of naturalism opening up a deeply satisfying account of our engagement with the natural world Alister McGrath Emeritus Andreos Idreos Professor of Science and Religion University of Oxford How to live with the pervasive reality of uncertainty and a plurality of perspectives in science religion and politics without playing down the sciences and our responsibilities The transcendental naturalism Arthur Petersen articulates in this book respects science while leaving room for other elements wonder judgements and values and the way we construct provisional models of reality These issues are

especially acute in the context of climate change when we face the interplay of science and policy Petersen stresses the importance of imagination to articulate meaning and of recognising a plurality of value laden perspectives striving for responsible action and sensitivity to that which may escape planning and policy This book can be read fruitfully in at least two ways as a highly relevant reflection on religion and science in the face of climate change and as a profound philosophical analysis of pluralism and provisionality and hence of living with uncertainty Willem B Drees Professor Emeritus of Philosophy of Religion and Ethics Leiden University and of Philosophy of the Humanities Tilburg University *A Political Theology of Nature* Peter Scott, 2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ's resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age
