Reenvisioning Landscapearchitecture

Catherine Heatherington

Reenvisioning Landscapearchitecture:

Re-envisioning Landscape/architecture Catherine Spellman,Peter Cook,Christine Boyer,2003 Re envisioning Landscape Architecture suggests that the relationship between landscape and architecture might be imagined over and over again in such a way that each is defined less as a quantifiable object and more as an idea a way of seeing act of making and way of engaging culture and society The essays collected here offer many interpretations and possibilities for this relationship with the common assumption that it should be considered at every negotiation between realms of thought and whenever culture and place are to be incorporated with understanding and meaning The collection is based in a belief that the landscape architecture relationship is at the center of all inspired design therefore in one way or another each essay addresses how this relationship is created nurtured and maintained to ensure the making of integrated design work

Re-envisioning the Relationship Between Landscape Architecture and the Politiced Food Complex Jennifer S. Walker,2009 Reimagining Industrial Sites Catherine Heatherington,2017-12-06 The discourse around derelict former industrial and military sites has grown in recent years This interest is not only theoretical and landscape professionals are taking new approaches to the design and development of these sites This book examines the varied ways in which the histories and qualities of these derelict sites are reimagined in the transformed landscape and considers how such approaches can reveal the dramatic changes that have been wrought on these places over a relatively short time scale It discusses these issues with reference to eleven sites from the UK Germany the USA Australia and China focusing specifically on how designers incorporate evidence of landscape change both cultural and natural There has been little research into how these developed landscapes are perceived by visitors and local residents This book examines how the tangible material traces of pastness are interpreted by the visitor and the impact of the intangible elements hidden traces experiences and memories The book draws together theory in the field and implications for practice in landscape architecture and concludes with an examination of how different approaches to revealing and reimagining change can affect the future management of the site
