Referendum Democracy Citizens Elites And Deliberation In Referendum Campaigns:

Referendum Democracy M. Mendelsohn, A. Parkin, 2001-09-25 As the referendum becomes a more regular component of decision making it leaves few if any institutions processes and values of democracy untouched Political actors of all kinds including political parties and interest groups seek to use the referendum device to further their own objectives The end result is a different kind of democracy than existed before This book lays out the comparative research agenda on the impact of referendums on the practice of liberal democracy The Dynamics of Referendum Campaigns Claes H. de Vreese, 2007-10-24 This book focuses on the key actors in a referendum the political elites parties the media and citizens and is centred around themes such as campaign style campaign effects electoral mobilization and turnout as well as vote choice The contributors consider the impact and importance of referendum campaigns **Constitutional Change and Popular Sovereignty** Maria Cahill, Colm Ó Cinnéide, Seán Ó Conaill, Conor O'Mahony, 2021-07-15 This collection focuses on the particular nexus of popular sovereignty and constitutional change and the implications of the recent surge in populism for systems where constitutional change is directly decided upon by the people via referendum It examines different conceptions of sovereignty as expressed in constitutional theory and case law including an in depth exploration of the manner in which the concept of popular sovereignty finds expression both in constitutional provisions on referendums and in court decisions concerning referendum processes While comparative references are made to a number of jurisdictions the primary focus of the collection is on the experience in Ireland which has had a lengthy experience of referendums on constitutional change and of legal political and cultural practices that have emerged in association with these referendums At a time when populist pressures on constitutional change are to the fore in many countries this detailed examination of where the Irish experience sits in a comparative context has an important contribution to make to debates in law and political science Evaluating Democratic Innovations Brigitte Geissel, Kenneth Newton, 2012 In the face of increasing political disenchantment many Western governments have experimented with innovations which aim to enhance the working and quality of democracy as well as increasing citizens political awareness and understanding of political matters This text is the most comprehensive account of these various democratic innovations Written by an outstanding team of international experts it examines the theories behind these democratic innovations how they have worked in practice and evaluates their success or failure It explains experiments with new forms of democratic engagement such as Direct Democracy Deliberative Democracy Co Governance E Democracy Drawing on a wide variety of theoretical perspectives and with a broad range of case studies this is essential reading for all students of democratic theory and all those with an interest in how we might revitalise democracy and increase citizen involvement in the political process *The Limits and Legitimacy of Referendums* Richard Albert, Richard Stacey, 2022-04-25 The possibility of democracy enhancing uses and anti democratic abuses of referendums reveals a paradox mechanisms of democracy can be exploited to do violence to the basic principles of democracy The Limits

and Legitimacy of Referendums seeks to identify standards we might use to assess the democratic legitimacy of a referendum when we cannot rely on the norms of traditional liberal democracy This innovative book explores how referendums manage the tension between liberalism and democracy and whether this device holds promise for reconciling these two commitments A range of scholars from around the world expose how referendums may be abused on one hand to achieve short term political or even personal gains and how on the other they may aspire to reflect the best traditions of deliberative innovative democracy enhancing popular decision making Structured around three big questions this book seeks to identify what makes a referendum legitimate First why have referendums on issues of fundamental political importance become so frequent around the world Second who are or who should be the people that make decisions about a political community's future And third are referendums an effective and reliable mechanism of popular sovereignty or democratic choice These essays written for scholars public lawyers political actors and citizens bring together diverse perspectives on referendums constitutionalism liberalism and democracy in ways that challenge the conventional wisdom prompt new answers to enduring questions and urge reconsideration of how we evaluate the legitimacy of referendums Citizen Participation in Democratic Europe Alberto Alemanno, James Organ, 2021-02-05 As the European Union undergoes a major self proclaimed democratic exercise the Conference on the Future of Europe and approaches Treaty change this volume offers a new model of citizen participation to address Europe's long standing democracy challenge and respond to the aftermath of the COVID 19 pandemic Proposed are a set of democratic innovations ranging from citizens assemblies to regulatory gaming to citizens initiatives and lobbying which are complementary not antagonistic to existing representative democracy across the European continent These innovations are emerging bottom up across the continent and getting traction at local national and EU level in a new era powered by technology This book brings together academics as well as practitioners to give a forward looking holistic view of the realities of EU citizen participation across the spectrum of participatory opportunities They all converge in arguing that after many years of proven experimentation the EU must institutionalize supranational participative and deliberative democratic channels to complement representative democracy and each other and ultimately improve the effectiveness of EU citizen participation While this institutional approach will not magically treat the EU democratic malaise it should make the system more intelligible accessible and ultimately responsive to citizen demand without necessarily undertaking Treaty reform The attempt to harness citizen participation to help address the current EU crisis needs the type of multi faceted approach presented in this book One that recognises the potential of existing and new democratic mechanisms and also importantly the links between different instruments of citizen participation to improve the overall quality of EU's democratic system Constitutional Referendums Stephen Tierney, 2012-04-05 The constitutional referendum has become a vital feature of modern constitution making and reform This book provides the first full length analysis of the theoretical foundations of constitutional referendums assessing their

democratic credentials and the design decisions that affect the value and legitimacy of the referendum process

The Politics of Referendum Use in European Democracies Saskia Hollander, 2019-04-02 This book demonstrates that the generally assumed dichotomy between referendums and representative democracy does not do justice to the great diversity of referendum types and of how referendums are used in European democracies Although in all referendums citizens vote directly on issues rather than letting their political representatives do this for them some referendums are more direct than others Rather than reflecting the direct power of the People most referendums in EU countries are held by and serve the interests of the political elites most notably the executive The book shows that these interests rarely match the justifications given in the public debate Instead of being driven by the need to compensate for the deficiency of political parties decision makers use referendums primarily to protect the position of their party In unravelling the strategic role played by national referendums in decision making this book makes an unconventional contribution to the debate on the impact of referendums on democracy

Sovereignty, Civic Participation, and Constitutional Law Brecht Deseure, Raf Geenens, Stefan Sottiaux, 2021-04-13 This book brings recent insights about sovereignty and citizen participation in the Belgian Constitution to scholars in the fields of law philosophy history and politics Throughout the Western world there are increasing calls for greater citizen participation Referendums citizen councils and other forms of direct democracy are considered necessary antidotes to a growing hostility towards traditional party politics This book focuses on the Belgian debate where the introduction of participatory politics has stalled because of an ambiguity in the Constitution Scholars and judges generally claim that the Belgian Constitution gives ultimate power to the nation which can only speak through representation in parliament In light of this direct democracy would be an unconstitutional power grab by the current generation of citizens This book critically investigates this received interpretation of the Constitution and by reaching back to the debates among Belgium's 1831 founding fathers concludes that it is untenable The spirit if not the text of the Belgian Constitution allows for more popular participation than present day jurisprudence admits This book is the first to make recent debates in this field accessible to international scholars It provides a rare source of information on Belgium's 1831 Constitution which was in its time seen as modern constitutionalism's greatest triumph and which became a model for countless other constitutions Yet the questions it asks reverberate far beyond Belgium Combining new insights from law philosophy history and politics this book is a showcase for continental constitutional theory It will be a valuable resource for academics and researchers in constitutional law political and legal philosophy and legal history

Comparative Constitution Making David Landau, Hanna Lerner, 2019 Recent years have witnessed an explosion of new research on constitution making Comparative Constitution Making provides an up to date overview of this rapidly expanding field

Democratic Innovations Graham Smith, 2009-07-02 Can we design institutions that increase and deepen citizen participation in the political decision making process At a time when there is growing disillusionment with the institutions of

advanced industrial democracies there is also increasing interest in new ways of involving citizens in the political decisions that affect their lives This book draws together evidence from a variety of democratic innovations from around the world including participatory budgeting in Brazil Citizens Assemblies on Electoral Reform in Canada direct legislation in California and Switzerland and emerging experiments in e democracy The book offers a rare systematic analysis of this diverse range of democratic innovations drawing lessons for the future development of both democratic theory and practice Political Communication Carsten Reinemann, 2014-07-28 Against the background of an enormous expansion and diversification of both political communication itself and scientific research into its structures processes and effects this volume gives an overview of some of the key theories and findings accumulated by political communication research over the last decades In order to do so the volume provides readers with review articles by renowned international authors on various aspects of I the normative regulatory and conceptual foundations of political communication II different situations of political communication e g elections referendums social movements media hypes crisis and war III the activities of and part played by political actors IV mass media and journalism V characteristics and typical features of media messages VI the role played by citizens as well as VII various kinds of effects on citizens Each section includes several chapters that address specific issues and research problems in the form of comprehensive overviews articles **Referendums and the European Union** Fernando Mendez, Mario Mendez, Vasiliki Triga, 2014-06-12 Why have referendums on European integration proliferated since the 1970s How are referendums accommodated within member states constitutional orders and with what impact on the European integration process What is the likely institutional impact of referendums on the future of the European integration process Drawing on an interdisciplinary approach these are just some of the fundamental questions addressed in this book The central thesis is that the EU is faced with a direct democratic dilemma which is compounded by the EU's rigid constitutional structure and a growing politicisation of the referendum device on matters related to European integration Referendums and the European Union discusses how this dilemma has emerged to impact on the course of integration and how it can be addressed *Radical Republicanism* Bruno Leipold, Karma Nabulsi, Stuart White, 2020-03-05 Republicanism is a powerful resource for emancipatory struggles against domination Its commitment to popular sovereignty subverts justifications of authority locating power in the hands of the citizenry who hold the capacity to create transform and maintain their political institutions Republicanism's conception of freedom rejects social political and economic structures subordinating citizens to any uncontrolled power from capitalism and wage labour to patriarchy and imperialism It views any such domination as inimical to republican freedom Moreover it combines a revolutionary commitment to overturning despotic and tyrannical regimes with the creation of political and economic institutions that realise the sovereignty of all citizens institutions that are resilient to threats of oligarchical control This volume is dedicated to retrieving and developing this radical potential challenging the more conventional moderate conceptions of republicanism It brings together scholars at

the forefront of tracing this radical heritage of the republican tradition and developing arguments texts and practices into a critical and emancipatory body of political and social thought The volume spans historical discussions of the English Levellers French and Ottoman revolutionaries and American abolitionists and trade unionists explorations of the radical republican aspects of the thought of Machiavelli Marx and Rousseau and theoretical examinations of social domination and popular constitutionalism It will appeal to political theorists historians of political thought and political activists interested in how republicanism provides a robust and successful radical transformation to existing social and political orders Deliberative Democracy and the Environment Graham Smith,2003-08-29 Contemporary democracies are frequently criticized for failing to respond adequately to environmental problems and our political institutions are often charged with misrepresenting environmental values in decision making processes In this innovative volume Graham Smith argues that the enhancement and institutionalisation of democratic deliberation will improve reflection on the wide range of environmental values that citizens hold Drawing on theories of deliberative democracy Smith argues that institutions need to be restructured in order to promote democratic dialogue and reflection on the plurality of environmental values *Deliberative Democracy and the Environment* makes an important contribution to our understanding of the relationship between democratic and green political theory Drawing on evidence from Europe and the United States it systematically engages with questions of institutional design **The Oxford Handbook of Political Institutions** R.
