the world in different ways from different perspectives Representing Reasons Feminist Theory and Formal Logic collects new and old essays that shed light on the underexplored intersection of logic and feminism The papers in this collection cross over many of the traditional divides between continental and analytic philosophy between philosophical reflection and empirical investigation and between empirical investigations with an individual or societal grain of analysis This is possible because Representing Reasons frames the relationship between logic and feminism in terms of issues rather than historical figures or methodologies As such the articles serve as a model for crossing these divides just as they break down the traditional divide between logic and feminism
