

A photograph of a group of people in a meeting or conference. In the foreground, a woman with short blonde hair is seen from behind, wearing a dark patterned top, sitting on a red chair. She is looking towards a group of people seated around a table in the background. The background is slightly blurred, showing a woman with long brown hair and two men. The scene is brightly lit, possibly by natural light from a window. A large blue diagonal shape is overlaid on the left side of the image.

Total Mobilization Roy Scranton,2019-07-24 Since World War II the story of the trauma hero the noble white man psychologically wounded by his encounter with violence has become omnipresent in America s narratives of war an imaginary solution to the contradictions of American political hegemony In *Total Mobilization* Roy Scranton cuts through the fog of trauma that obscures World War II uncovering a lost history and reframing the way we talk about war today Considering often overlooked works by James Jones Wallace Stevens Martha Gellhorn and others alongside cartoons and films Scranton investigates the role of the hero in industrial wartime showing how such writers struggled to make sense of problems that continue to plague us today the limits of American power the dangers of political polarization and the conflicts between nationalism and liberalism By turning our attention to the ways we make war meaningful and by excavating the politics implicit within the myth of the traumatized hero *Total Mobilization* revises the way we understand not only World War II but all of postwar American culture Indigenist Mobilization Luisa Steur,2017-05-01 In Kerala political activists with a background in Communism are now instead asserting political demands on the basis of indigenous identity Why did a notion of indigenous belonging come to replace the discourse of class in subaltern struggles *Indigenist Mobilization* answers this question through a detailed ethnographic study of the dynamics between the Communist party and indigenist activists and the subtle ways in which global capitalist restructuring leads to a resonance of indigenist visions in the changing everyday working lives of subaltern groups in Kerala *Infinite Mobilization* Peter Sloterdijk,2020-04-22 The core of what we refer to as the project of modernity is the idea that human beings have the power to bring the world under their control and hence it is based on a kinetic utopia the movement of the world as a whole reflects the implementation of our plans for it But as soon as the kinetic utopia of modernity is exposed its seemingly stable foundation cracks open and new problems appear things don t happen according to plan because as we actualize our plans we set in motion other things that we didn t want as unintended side effects We watch with mounting unease as the self perpetuating side effects of modern progress

overshadow our plans as a foreign movement breaks off from the very core of the modern project supposedly guided by reason and slips away from us spinning out of control What looked like a steady march towards freedom turns out to be a slide into an uncontrollable and catastrophic syndrome of perpetual mobilization And precisely because so much comes about through our actions these developments turn out to have explosive consequences for our self understanding as we begin to realize that so far from bringing the world under our control we are instead the agents of our own destruction In this brilliant and insightful book Sloterdijk lays out the elements of a new critical theory of modernity understood as a critique of political kinetics shifting the focus of critical theory from production to mobilization and shedding new light on a world facing the growing risk of humanly induced catastrophe Mobilizing for Democracy Vera Schatten Coelho, Bettina von

Liers, 2013-04-04 Mobilizing for Democracy is an in depth study into how ordinary citizens and their organizations mobilize to deepen democracy Featuring a collection of new empirical case studies from Angola Bangladesh Brazil India Kenya Nigeria and South Africa this important new book illustrates how forms of political mobilization such as protests social participation activism litigation and lobbying engage with the formal institutions of representative democracy in ways that are core to the development of democratic politics No other volume has brought together examples from such a broad Southern spectrum and covering such a diversity of actors rural and urban dwellers transnational activists religious groups politicians and social leaders The cases illuminate the crucial contribution that citizen mobilization makes to democratization and the building of state institutions and reflect the uneasy relationship between citizens and the institutions that are designed to foster their political participation State, Society and Mobilization in Europe during the First World War John Horne, 1997-07-03 This

volume examines political and cultural mobilisation in the face of industrialised mass death during the First World War Comparing Britain France Germany Italy and Austria Hungary it generates arguments on mobilisation and total war which have wider relevance It explores national ideals which cast the war as a crusade the inclusive self mobilisation of sectional identities and private organisations behind national efforts and the exclusion of suspect groups the enemy within from the mobilisation process It also highlights the importance and difficulty of assessing the limits of mobilisation as well as the differing capacities of the state to sustain it factors related to prior degrees of national integration and political legitimacy Mobilisation in this sense was an important factor which determined the outcome and legacy of the war *(De)mobilizing the Entrepreneurship Discourse* Frederic Bill, Anders W. Johansson, 2010-01-01 This book is a banquet for readers who are

open to a broader menu of ideas and insights into the nature of entrepreneurship how it occurs and the circumstances by which it manifests itself By seeing the phenomenon of entrepreneurship in new and intriguing ways the authors in this book helped me re imagine the many different kinds of entrepreneurships that exist I m very impressed with the creativity and scope of this book and the cleverness of these scholars to bring so many delicious perspectives to the table A book that is challenging and enjoyable to read William B Gartner Clemson University US This unique and fascinating book takes a critical

look at aspects of the prevalent entrepreneurship discourse and presents several substantive new theories prescribing what should be abandoned demobilization and what should be adopted or given a more central position mobilization The contributors contend that entrepreneurship is not only an economic matter that it is not a predominantly male gender issue and that it is not only done by heroes or extraordinary efforts but rather that it is as much a matter of ordinary routine activities They conclude that the entrepreneurship literature could greatly benefit from including the concepts of space and place that resistance to it is an important aspect of its success and that it is just as much about imitation as about creativity Finally they address the issue that what should be demobilized or mobilized in the entrepreneurship discourse might actually be the wrong question since entrepreneurship is arguably a way of life At the cutting edge of entrepreneurship research this thought provoking book will prove a stimulating read for entrepreneurship academics students and researchers in the fields of entrepreneurship and business and management

Defying Conventional Wisdom Jeffrey McKelvey Ayres,1998-01-01 The first major study on the origins strategies and activities of movements and coalitions in opposition to free trade that arose in Canada and spread across North America it captures an important developmental period in Canadian political life

F. Lee, 2018-05-16 The Umbrella Movement in Hong Kong caught the world s attention and imagination at the end of 2014 The 79 day occupation campaign took on some of the characteristics of the recent wave of large scale protest movements around the world including the prominent roles played by the media both conventional and digital in the mobilization and communication processes of the movement This edited volume *Media Mobilization and the Umbrella Movement* brings together nine contributions which examine various aspects of the media movement nexus including the power of televised images to mobilize people the role of social media in the insurgent public

The First World War and the Mobilization of Biblical Scholarship Andrew Mein, Nathan MacDonald, Matthew A. Collins, 2019-02-07 This fascinating collection of essays charts for the first time the range of responses by scholars on both sides of the conflict to the outbreak of war in August 1914 The volume examines how biblical scholars like their compatriots from every walk of life responded to the great crisis they faced and with relatively few exceptions were keen to contribute to the war effort Some joined up as soldiers More commonly however biblical scholars and theologians put pen to paper as part of the torrent of patriotic publication that arose both in the United Kingdom and in Germany The contributors reveal that in many cases scholars were repeating or refining common arguments about the responsibility for the war In Germany and Britain where the Bible was still central to a Protestant national culture we also find numerous more specialized works where biblical scholars brought their own disciplinary expertise to bear on the matter of war in general and this war in particular The volume's contributors thus offer new insights into the place of both the Bible and biblical scholarship in early 20th century culture

Political Mobilizations and Democratization in Sub-Saharan Africa Wolfgang Stuppert, 2019-06-14 This book explores why democratization processes in Sub Saharan Africa have made so little progress despite more than two decades of multi party politics on the subcontinent By applying multiple linear regression analyses to a new data set on multi party elections in Sub Saharan Africa the study investigates the relationship between political mobilizations and electoral competitiveness It finds that the more societal groups engage in political mobilizations such as protests and strikes the more competitive elections become Based on these results the author argues for a change in the policies of international democracy assistance programs The study's findings suggest that efforts to promote democracy would likely be more successful if international donors focused their support on organizations that have active constituencies and are willing to use their mobilization capacity to address ruling elites with political or socio economic grievances
