Community Health Nursing Karen Saucier Lundy, Sharyn Janes, 2009 Historically, community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. *Community Health Nursing: Caring for the Public's Health*, Second Edition, reflects this response and is representative of what communities signify in the United States: a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population-based nursing directed toward health promotion and primary prevention in the community. It is both community-based and community-focused, reflecting the current dynamics of the health care system. The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies. The chapters covering Family Health, Ethics, Mental Health, and Pediatric Nursing have all been significantly revised and updated.

The Handbook of Community Mental Health Nursing Michael Coffey, Ben Hannigan, 2005-07-25 This handbook brings together authoritative contributions from leading mental health researchers, educators, and practitioners to provide a comprehensive text for community mental health nurses in training and practice. In thirty-three chapters, it covers a wide range of topics from the history of the profession to current approaches to specific client groups, organised around three linked themes: professional context, practice issues, education and research. Each chapter includes a summary of key points and suggestions for further reading and also includes useful appendices listing key professional and voluntary organisations, journals, Internet and mailing lists. The handbook reflects the diversity and scope of the role of the CMHN and recognizes the multidisciplinary and service user context in which nurses work. It is an essential text for CMHNs and mental health nurse educators and offers a useful source of reference for allied professionals.
