Fieldwork in Geography: Reflections, Perspectives and Actions Rod Gerber, Goh Kim Chuan, 2013-03-14 Geographers regard fieldwork as a vital instrument for understanding our world through direct experience for gathering basic data about this world and as a fundamental method for enacting geographical education The range of international geography and educational experts who contributed to this volume has demonstrated that the concept of fieldwork has a considerable history in the field of geography They have demonstrated that the theoretical aspects of fieldwork have been interpreted differently in regions around the world but the importance of fieldwork remains strong globally A fresh look at the pedagogic implications for fieldwork in formal education offers ideas both for promoting it in geographical education and for maintaining its place in the geography curriculum Audience Forward looking geographers and educators now recognise that alternative strategies especially those involving the use of information technology should be developed to reaffirm the centrality of fieldwork in geographical and wider education □□□□□□□□□□, 1994

Reflections and Perspectives Henry Ford, 2018-11-11 Reflections and Perspectives Powerful Life Lessons is a motivational self help book written to encourage one to grow through the challenges they are confronted with The author uses his background of 36 years in Corporate America and over 30 years of business ownership to address some of the challenges common to those seeking to survive grow and prosper in their career or

business The book reveals how personal relationships can impact one's desire and ability to develop to sustain and to pursue their passion Citing unforgettable personal examples the author shares how the words and actions of others can negatively impact the choices we make but how ultimately we can and must be responsible for our own actions Readers are introduced to real life examples of how closed doors are sometimes closed for good reason sometimes as a blessing in disguise The author shares how his greatest opportunities resulted from what he believed were unwarranted actions against him He reveals how a job loss became a career gain The author cautions us against accepting labels deeming ourselves either inferior to or superior to others He reminds us that many of the differences which we allow to divide us are differences decided by our Creator and that we are not qualified to second guess that wisdom which goes beyond our understanding The importance of having great mentors is revealed along with the importance of one not taking their mentors for granted Examples are shared of how fulfilling your commitments is critical not just to your success and reputation but also as an appropriate thank you for the time and other resources the mentor has graciously invested in you The author reminds us that giving back benefits the giver as well as the receiver This latest book extends the author's belief in the necessity for a strong spiritual foundation as the guiding light through periods of darkness He believes and conveys to the reader that each of us has a calling that if left unanswered will become a challenge unmet a problem unsolved an opportunity missed a dream and a legacy unfulfilled a link missing from the chain of events that were meant to form the history of the world The book is a powerful but easy to read call for the reader to become that positive change they wish to see in the world Exploring Betty A. Good Practices in Doctoral Supervision Mar Reguero,Joan Josep Carvajal,Maria Ercilia García,Mireia Valverde,2017-01-01 Within the European context there are many initiatives for PhD supervisory training already in existence but a more systematic approach to this task would be needed In this landscape we took the initiative of organizing an informal meeting for experts with an interest and expertise on PhD supervisory training the Tarragona Think Tank on PhD supervisory training challenges and good practices hosted by University Rovira i Virgili URV Tarragona This event allowed both the presentation of individual university experiences and the undertaking of a collective reflection on challenges impact assessment and the visualisation of an ideal future for PhD supervisory training Noting the need for more concerted efforts and practices the present book is precisely a first tangible outcome of this concerted effort Looking forward we expect that this book can help setting the basis for the development of a network or alliance between the participating organisations and an ongoing effort aimed at bringing the professionalization of doctoral supervisors to the forefront in education policy at the university level In sum we hope that this contribution can help materialising ideas into actions

Social Structure and Voting in the

United States Robert B. Smith, 2016-03-09 This book analyzes practical and moral influences on voting decisions. Undermining the widespread assumption that economic self interest is the key determinant of voting choices, it discovers that moral considerations rooted in religious traditions are often the more decisive. This finding is confirmed through a close analysis of tangible problems such as child neglect and crime problems which one would expect to trouble practical voters. Further, this book suggests that political ideologies influence party affiliation rather than the other way around. It defines four categories of states in terms of human development and income equality: South, Heartland, postindustrial, and balanced. It then explains why political color (red, purple, or blue) and societal problems vary across these categories. Voters' moral ideologies, it shows, combine with a state's measure of income equality and human development to shape a state's readiness to pursue practical solutions to societal problems. Finally, it shows that moral ideologies of the religious right and authoritarianism, two very different concepts, are in fact intertwined empirically. This book thus suggests that education, a key driver of human development, anti-authoritarianism, and deliberative voting should begin in preschools that are both nurturant and instructive.

Fieldwork for Human Geography Richard Phillips, Jennifer Johns, 2012-03-28 A highly readable and superbly fun guide to the why and how of doing fieldwork in human geography. I recommend it highly to any geographer wannabes and practicing geographers. The latter group, including myself, might well rediscover the fun of doing geography. Professor Henry Yeung, National University of Singapore. An excellent introduction to the art and science of fieldwork. It makes clear that fieldwork is not just about getting out of the classroom and gaining first-hand experience of places; it is about instilling passion about those places. Professor Stuart C. Aitken, San Diego State University. An indispensable guide to fieldwork that will enrich the practice of geography in a myriad of different ways. In particular, the diverse materials presented here will encourage students and academics alike to pursue new approaches to their work and instill a greater understanding of the conceptual and methodological breadth of their discipline. Professor Matthew Gandy, University College London. If fieldwork is an indispensable component of geographical education, then this book is equally essential to making the most of fieldwork. This book gives students the tools to realise the full potential of what for many is the highlight of their geography degree. Professor Noel Castree, Manchester University. Fieldwork is a core component of Human Geography degree courses. In this lively and engaging book, Richard Phillips and Jennifer Johns provide a practical guide to help every student get the most out of their fieldwork. This book encourages students to engage with fieldwork critically and imaginatively. Explains methods and contexts. Links the fieldwork with wider academic topics. It looks beyond the contents of research projects and field visits to address the broader experiences of fieldwork: working in groups, understanding your ethical position, developing skills for learning and employment, and opening your eyes, ears, and minds to the wider possibilities of your trip. Throughout the book, the authors present first-person descriptions of field experiences and predicaments written by fieldtrip leaders and students from around the world, including the UK, Canada, Singapore, Australia, and Africa.

Transformative Museum Experiences

Licia Calvi,Arnold Vermeeren,Amalia Sabiescu,2025-07-17 Following on the volume Museum Experience Design 2018 this book acknowledges the changing role of museums in society with a focus on designing experiences as vehicles for transformation We look at transformation through a systemic perspective anchored in the experience that museums offer to visitors One facet of our exploration regards the museum experience itself as an instrument for change At this level we conceptualise what we mean by a transformative experience and look at design approaches specifically geared towards inducing transformation We then turn attention towards the way recent changes in the socio political and cultural context reverberated in structural and functional changes inside the museum and connected institutions and communities with shifting museum identities and new forms of cooperation emerging Finally we zoom in on the role of technology in the making of transformative museum experiences looking at opportunities and affordances but also calling for an ethical approach to integration of technology in museum practice *Fieldwork in Humanities Education in Singapore* Teddy Y.H. Sim,Hwee Hwang Sim,2021-02-20 This book addresses the topic of humanities education fieldwork using the Singapore context as its primary focus It explores how the thought processes behind and techniques of various humanities and social sciences subjects can be applied to fieldwork in a variety of school and training settings In addition it discusses how humanities students and educators could stand to benefit from utilizing fieldwork techniques and skills used in archaeology and anthropology beyond undergraduates majoring in that discipline Finally the adoption of multidisciplinary approaches in fieldwork incorporating history geography literature and social studies demonstrate how these subjects can collaborate together in actual case studies to facilitate participants learning in the field
