**The Ethics of Military Privatization** David M. Barnes, 2016-08-25 This book explores the ethical implications of using armed contractors taking a consequentialist approach to this multidisciplinary debate While privatization is not a new concept for the US military the public debate on military privatization is limited to legal financial and pragmatic concerns A critical assessment of the ethical dimensions of military privatization in general is missing More specifically in light of the increased reliance upon armed contractors it must be asked whether it is morally permissible for governments to employ them at all To this end this book explores four areas that highlight the ethical implications of using armed contractors how armed contractors are distinct from soldiers and mercenaries the commodification of force the belligerent equality of combatants and the impact of armed contractors on the professional military While some take an absolutist position wanting to bar the use of private military altogether this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option Recognising that outsourcing force will continue this book thus proposes some changes to account for the problems of commodification belligerent equality and the challenge to the military profession This book will be of interest to students of private security military studies ethics security studies and IR in general

Education, Conflict and

Development Julia Paulson, 2011-05-16 Under various names education and conflict education and fragility education and insecurity etc the understanding of linkages between education and violent conflict has emerged as an important and pressing area of inquiry Work and research by practitioners and scholars has clearly pointed to the negative potential of education to contribute to and entrench violent conflict This work has highlighted the struggle for education during and following periods of instability and demonstrated the degree to which communities affected by conflict prioritize educational opportunities It has also offered powerful normative arguments for the importance of quality education for peacebuilding reconciliation postconflict reconstruction and development In many instances however these important insights are derived less from rigorous research and scholarship in the social sciences than from the delivery and evaluation of educational programming in situations affected by conflict This volume therefore seeks to broaden enquiry into education and conflict by exploring through conceptual and empirical work its linkages to broader theories and practices of development and peacebuilding The volume begins with a conceptual and theoretical section followed by a series of international case studies before closing with three chapters focused on the case of Northern Uganda Contributors present a diverse set of studies that together deepen understandings of the ways the education functions in various situations affected by conflict and the ways in which it might best be mobilized to contribute towards peacebuilding and development New Perspectives in Information Systems and Technologies, Volume 1 Álvaro Rocha, Ana Maria Correia, Felix .
