

Midwifery Care: Reflections of Midwifery Clients

Mary Ellen Doherty, PhD, RN, CNM

ABSTRACT

The purpose of this study was to describe the lived experience of midwifery clients throughout the life span. A qualitative study using a phenomenological approach was employed. In-depth interviews were conducted with a purposive sample of 12 midwifery clients. The research question was: What has been your experience with midwifery care? Interviews were audio-recorded and transcribed verbatim. Data saturation was achieved and analysis procedures from Colaizzi were used. Five themes emerged from the data: 1) decision to seek midwifery care; 2) working together in a therapeutic alliance; 3) formulating a birth plan; 4) childbirth education; and 5) nurse-midwives as primary health-care providers throughout the life span. There is much to learn from listening to the voices of midwifery clients.

According to historical accounts, as women gave birth, they always sought care and support from others. At some point in the cultural evolution, women who were experienced in attending others in childbirth became known as “midwives.” The term midwife means “with woman” (Aveling, 1977; Rooks, 1997; Varney, 1997) and dates back to the 14th century, with its etymology from Old and Middle English. However, accounts dating back to the 2nd century confirm the role of midwives in the birthing process, with the Hebrew Bible containing numerous verses about midwifery, such as Genesis 35:17 and 38:28 and Exodus 1:15–22 (Wansborough, 1985). Furthermore, the mention of birth attendants can be traced to ancient Greek and Roman civilizations as well as in the writings of old Hindu traditions. Evidence of midwifery

has been told in myths, texts, and oral traditions. Thus, as a profession, midwifery claims a social role throughout history in all cultures.

Midwifery in today's health-care arena extends well beyond the childbearing season to include aspects of women's health care such as preconception care, perimenopausal and postmenopausal care, family planning and contraception, childbirth education, well-woman gynecology, and primary care throughout the life span. The midwifery model of care is client-focused and family-centered, embracing the holistic and humanistic principles of health maintenance, health promotion, client education, counseling, advocacy, and collaboration. Women from all walks of life use the services of nurse-midwives—from educated professionals to adolescents, midwifery clients represent the complete

Supporting Physiological Birth Choices in Midwifery Practice Claire Feeley, 2023-02-28 Highlighting the experiences of midwives who provide care to women opting outside of guidelines in the pursuit of physiological birth Claire Feeley looks at the impact on midwives themselves and explores how teams and organisations support or discourage women's birth choices This book investigates the processes experiences and sociocultural political influences upon midwives who support women's alternative birthing choice and

argues for a shift in perspective from notions of an individual's professional responsibility to deliver woman-centred care to a broader collective responsibility. The book begins by contextualising the importance of quality midwifery care with an exploration of the current debates to demonstrate how hegemonic birth discourse and maternity practices have detrimentally affected physiological birth rates and the wellbeing of women who opt outside of maternity guidelines. It provides real-life examples of how midwives can facilitate a range of birthing decisions within mainstream midwifery services. Moreover, an exploration of midwives' experiences of delivering such care is presented, revealing deeply polarised accounts from moral injury to job fulfilment. The polarised accounts are then presented within a new model to explore how a midwife's socio-political working context can significantly mediate or exacerbate the vulnerability, conflict and stigmatisation that they may experience as a result of supporting alternative birth choices. Finally, this book explores the implications of the findings, looking at how team and organisational culture can be developed to better support women and midwives, making recommendations for a systems approach to improving maternity services. Discussing the invisible nature of midwifery work, what it means to deliver woman-centred care and the challenges and benefits of doing so, this is a thought-provoking read for all midwives and future midwives. It is also an important contribution to interprofessional concerns around workforce development, sustainability, moral distress and compassion in health and social care.

Midwives Coping with Loss and Grief
Doreen Kenworthy, Mavis Kirkham, 2019-01-22

The experience of stillbirth and other losses in pregnancy at what is usually a time of great joy is tragic for everyone involved, including midwifery professionals. Although research increasingly shows how profound the effects of loss can be, few studies have explored the effects of pregnancy loss, which often leads to other personal and professional traumas such as loss of autonomy or a workplace on midwives. This in-depth investigation uses a phenomenological approach to capture midwives' experiences of loss and grief in their own words and encompasses both pregnancy loss and wider professional and personal issues. It then makes recommendations to enhance midwives' resilience and ability to cope appropriately whilst giving maximum support to their clients. Reflections on the emerging implications for midwifery education and practice further broaden the scope of the analysis. The insights in this book will be of great use to midwifery managers and supervisors. They will also help midwives to nurture themselves, their colleagues and their clients at a time when pressures on the service can leave support lacking. The devastating experience of losing a baby for women and their families is something that as midwives we strive to understand in order to provide appropriate practical and emotional support. Doreen and Mavis encourage us to consider how we are affected by the grief of others at a deeply personal level. Ultimately, the message in this book is one of hope through reflection and the sharing of experiences: midwives who have been with women whose babies have died can regain their personal strength and learn to re-shape memories in ways that contribute to personal growth and understanding.
