Abstract: In recent years, the India and the Pacific region has become an essential foreign policy focus for many countries around the world, as a new growth point in the global economy and a center of power interaction. The shift from the American “Return to Asia-Pacific” strategy to the “Indo-Pacific Strategy” reflects not only the expansion and deepening of the US policy framework in Asian region, but also the enhanced strategic role and changing attitude of India, as an opportunity and focus point for the construction of the new “Indo-Pacific Strategy” in this framework. For the time being, however, India’s strategic role is still constrained by many factors, both domestic and external. This paper will therefore analyze the reasoning for the change in American strategy toward the Indo-Pacific area as well as the evolving position of India within it, analyzing its role and potential in the area in the context of India’s situation.

Keywords: India, Indo-Pacific, China-India Relations

1. Introduction

1.1. Research Background

The 21st century has witnessed the accelerated growth of the Asia, as well as the Pacific region and the regional development of China and India, which has attracted the attention of Washington. The major US policy shift in Asia began with the Obama Administration’s Asia-Pacific Rebalancing Strategy, after which the America gradually ended the “Anti-Terrorism” operations waging around the world, reoriented its tactical concentration to the Asia and Pacific region. After Trump took office, he officially used the term “Indo-Pacific” in Government documents Unprecedentedly, replacing the traditional concept of “Asia-Pacific.” Moreover, eventually, Trump expanded it into the Indo-Pacific Strategy and made it a core principle in handling U.S. relations with Asia. Soon after Biden took office, he released the American Indo-Pacific Strategy Report, which fully inherited the Indo-Pacific

The Course Reflection Project Nicole Schonemann, Emily Metzgar, Andrew Libby, 2015-05-01 Service learning is entering a post initiatory phase At tertiary institutions of all types and sizes service learning programs are common and service learning requirements for graduation are growing in popularity Taken together alongside continued faculty interest in effective teaching these factors have raised the visibility and popularity of service learning Now the greater need in service learning is not to prove the need for or efficacy of service learning but to turn the focus squarely back on practice Following established best practice is not enough instructors also need to reflect on how this fits within the specific context and application of each unique course and service learning partnership While there are many excellent resources that detail best practice and showcase exemplary service learning courses faculty reflection and course revision often goes unmentioned In response to the lack of attention on the role of reflection and course revision we convened groups of faculty from a variety of disciplines to reflect deeply on their courses paying specific attention to obstacles and challenges These conversations were converted to articles for this edited collection each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts This text contributes to the body of literature on service learning in a unique and

practical manner Faculty teaching or interested in teaching service learning classes would benefit from this text as well as university administrators and community service directors involved in service learning at a programmatic and institutional level This book should be marketed to faculty teaching disciplinary service learning classes and service learning pedagogy classes and administrative offices involved in service learning This could be a supplementary text for graduate level pedagogy courses Higher education institutional libraries would benefit from this text as well as the national and state campus compact offices

Handbook of Reflection and Reflective Inquiry Nona Lyons, 2010-04-07 Philosophers have warned of the perils of a life spent without reflection but what constitutes reflective inquiry and why it is necessary in our lives can be an elusive concept Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew encouraging critical thinking and crucial insight teaching and learning In its opening pages two seasoned educators Maxine Greene and Lee Shulman discuss reflective inquiry as a form of active attention Thoreau's wide awakeness an act of consciousness and a process by which people can

understand themselves their work particularly in the form of life projects and others Building on this foundation the Handbook analyzes through the work of 40 internationally oriented authors Definitional issues concerning reflection what it is and is not Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education Reflection as promoted across professional educational domains including K 12 education teacher education occupational therapy and the law Methods of facilitating and scaffolding reflective engagement Current pedagogical and research practices in reflection Approaches to assessing reflective inquiry Educators across the professions as well as adult educators counselors and psychologists and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times *Critical Reflections on the Cold War* Martin J. Medhurst, H. W. Brands, 2000 Rhetoric and history intersected dramatically during the Cold War which was above all else a war of words This volume which combines the work of historians and communication scholars examines the public discourse in Cold War America from a number of perspectives including how rhetoric shaped history and policies and how rhetorical images invited interpretations of history The book opens with Norman Graebner's wideranging analysis of the rhetorical background of the Cold War Frank Costigliola then parses Stalin's speech of February 1946 an address that many in the West took as a declaration of war by the USSR The development of NSC68 in 1950 often referred to as America's blueprint for fighting the Cold War is the subject of Robert P Newman's review Shawn J Parry-Giles and J Michael Hogan then focus on American propaganda responses to the perceived Soviet threat H W Brands Randall B Woods and Rachel L Holloway examine the effects of liberal ideology and rhetoric on domestic and foreign policy decisions Robert J McMahon and Robert L Ivie raise the issue of what it has meant to be the leader of the Free World and what the task of postCold War rhetoric will be in this regard Scholars concerned with the role of words in public life and in the study of history will find challenging material in this interdisciplinary volume Historians speech communication scholars and political scientists with an interest in the Cold War will similarly find grist for further milling Reflections on the Constitution (Works of Harold J. Laski) Harold J. Laski, 2014-10-24 This work remains of interest to anyone concerned with Britain's political institutions and how they might be reformed Laski was strongly in favour of utilising Britain's capacity for decisive government to drive through great social reforms He was still confident that there was a majority will for such change and quite unable to imagine the kind of centralisation that was later to take place in the UK If Laski is still important it is more for his pluralist views which counsel against such developments but these lectures are still of interest in showing how a radical reformer could accept and defend established institutions like the House of Commons *Morgenthau* William E. Scheuerman, 2013-04-30 The ideas of Hans Morgenthau dominated the study of international politics in the United States for many decades He was the leading representative of Realist international relations theory in the last century and his work remains hugely influential in the field In this engaging and accessible new study of his work William E Scheuerman provides a comprehensive and illuminating

introduction to Morgenthau's ideas and assesses their significance for political theory and international politics. Scheuerman shows Morgenthau to be an uneasy Realist, uncomfortable with conventional notions of Realism and sometimes unsure whether his reflections should be grouped under its rubric. He was a powerful critic of the existing state system and defended the idea of a world state. By highlighting Morgenthau's engagement with the leading lights of European political and legal theory, Scheuerman argues that he developed a morally demanding political ethics and an astute diagnosis of the unprecedented perils posed by nuclear weaponry. Believing that the irrationalities of US foreign policy were rooted partly in domestic factors, he sympathized with demands for radical political and social change. Scheuerman illustrates that Morgenthau's thinking has been widely misunderstood by both disciples and critics and that it offers many challenges to contemporary Realists who discount his normative aspirations. With the advent of the cosmopolitan goal of international reform, Morgenthau's work serves up an unsettling mix of sympathy and hard-headed skepticism, which remains crucially important in the development of the field. Lucidly and persuasively written, this book will be a valuable resource for students and scholars seeking to understand the continued importance of Morgenthau's thinking.

Chinese Foreign Relations: Reflections On Knowledge Production Ming Wan, 2024-11-12. With China's global ascendancy, Chinese foreign policy has become a popular area of study for scholars around the world. Rather than simply contributing to this subject, this book sets out to reflect on the field itself, using as samples some of the author's previous work, both published and unpublished, covering different areas of Chinese foreign policy and adopting different approaches. In doing so, it examines how knowledge about Chinese foreign policy has developed, focusing on areas such as traditions, values, perspectives, and regionalism. The field of Chinese foreign policy has evolved along with international relations and foreign policy analysis. Studies on specific topics have generally been of high quality thanks to the competitive and extensive nature of academic research and exchange, despite a perceived failure to predict Beijing's current assertive foreign policy orientation. Looking forward, this book reflects on how certain current tendencies, excessive focus on national security, narrowing of academic exchange, and access between China and the West, and a shift to rivalry-driven analysis, threaten to lower the quality of future Chinese foreign policy studies in Western countries.

Second Thoughts on Capitalism and the State Leslie Sklair, 2022-05-02. This collection of essays highlights the need for sociological and political analysis of actual alternatives to capitalism and the existing system of so-called nation states. It challenges the conventional idea that capitalism can be successfully reformed to meet the needs of most people in the world, confronting it with the existential threats posed by the perfect storm of climate change and the Anthropocene, hyper-urbanization, and the Coronavirus pandemic. Written over a period of 50 years, it charts the ways in which capitalism and socialism have evolved as global systems, their successes and failures, to the point that it is easier to imagine the end of the world than the end of capitalism. It offers ways forward: community by community. *Reflection Coefficients for the Computer Simulation of Loran C/D Pulse Propagation Transforms* J. Ralph Johler, 1973. **Reflections**
