Integrating Eastern Europe into the Global Economy: J.M. Van Brabant, 2012-12-06 This book is designed as a modest contribution to the ongoing deliberations about how to ease the fairly tight constraints on the external payments of many countries of the eastern part of Europe In the first instance this inquiry is addressed to those that have embarked on wide ranging systemwide reforms External constraints have been markedly hampering the introduction of market oriented economic mutations thereby raising the cost of transition far above levels expected at the outset of the present wave of uniquely restructuring the countries involved I explore here several angles of this discussion But three stand out One is the disintegration of the postwar framework for economic cooperation in that part of the world Another is the disarray brought about by incisive economic transformations in the area Finally various national regional and international interest groups are at work there hoping to mold somehow the drift of the reform or at least key components thereof in their own image In the process it is often forgotten as Ralf Dahrendorf 1990 p 41 so pointedly remarked that all systems mean serfdom including the natural system of a total market order in which no one tries to do anything other than guard certain rules of the game discovered by a mysterious sect of economic advisers

The Post-Socialist City Kiril Stanilov, 2007-08-13 In the large body of literature produced during the last fifteen years on the transformation of Eastern European societies after the fall of communism studies investigating changes in urban form and structure have been quite rare Yet a profound reorganization of the manner in which urban space is appropriated has taken place impacting the life of over 200 million urban residents in the region The patterns of spatial organization which have been established during this fairly limited but critical timeframe are likely to set the direction of future urban development in CEE cities for a long time This book focuses on the spatial transformations in the most dynamically evolving urban areas of post socialist Central and Eastern Europe linking the restructuring of the built environment with the underlying processes and forces of socio economic reforms We hope that the detailed accounts of the spatial transformations in a key moment of urban history in the region will enhance our understanding of the linkages between society and space adding to the knowledge that is needed for resolving the difficult challenges facing cities throughout the globe in the beginning of the twenty first century

The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker, 2006-01-01 Frank Bönker has done a masterful job This is probably the best book available on this important subject and its significance is not limited to studies of postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy

Small Transformations János Mátyás Kovács, 2003 East Central Europe is about to bring its welfare reforms to the European Union Nevertheless in the course of the Accession one could hardly fix the European standards of social policy or examine to what degree the newcomers may have approached them Evidently there has always been a variety of welfare regimes in the EU Moreover today's experts in post communist countries do not find stable policies and institutional arrangements in the West but rather another reform process the domestication of the classical welfare states True the general trends are not dissimilar partial retrenchment decentralization marketisation and privatisation of public welfare services as well as an upsurge of the voluntary sector are the main characteristic features of regulating welfare on both sides of the former Iron Curtain These issues are addressed by the contributors of this volume leading representatives of their professions in an unprecedented way In avoiding the convenient cliché
