### **Teachers at Their Best**

Rich Waters,2018-04-03 The purpose of this book is to change the conversation about teacher induction preparation and development and how we create effective teachers Our national discussion about how to create effective teachers needs to move away from how higher education can do a better job preparing our teachers and move toward how our local schools can do a better job inducting preparing and developing our teachers over a full career There are two interconnected and irrefutable reasons for this First school culture supersedes all rational strategies for teacher development and second teachers learn to teach in the schools where they work not in higher education or any of the alternative routes which the ineffectiveness of higher education teacher preparation have caused to emerge With the affirmation of these postulates this book clarifies that teachers are at their best when they are working together in collaborative cultures where teacher thinking and decision making lead schools in continuous improvement and change Elaborating on the importance of these best conditions for optimal teacher development this book will insist that it is the entirety of a school culture that produces effective teachers and schools with authentic learning communities produce the cultures that produce effective teachers

### **Teacher Education in the Asia-Pacific Region**

Paul Morris,John Williamson,2013-10-08 This book investigates the relationships between education and national development in an area of the world where both have acquired considerable importance It questions assumptions which view education primarily as a direct investment in human capital and approaches which measure the efficacy of educational provision solely in terms of quantifiable differences between inputs and outputs Unlike most of the more general works in this field it does not set out either to confirm or to refute a particular theory Instead the main perspectives which have been adopted to explain the role of education in development are explored The role of education in the development of eight societies in East Asia including Japan Hong Kong Singapore Taiwan South Korea Malaysia Macau and the People s Republic of China is examined These societies are compared in order to highlight the diverse and complex role played by education in their development

### Lessons from the Teachers for a New Era Project

G. McDiarmid,Kathryn Caprino,2017-07-06 Chronicling a high profile and ambitious teacher preparation reform project that took place across 11 diverse U S institutions this volume examines the strategies program changes accomplishments and challenges from the Teachers for a New Era Project TNE Exploring both the successes and tensions that arose from the program this book contributes to future teacher education and program assessment endeavors and offers lessons that can inform current policies and practices

### **Crisis in Teaching**

Lois Weis,Philip G. Altbach,Gail P. Kelly,Hugh G. Petrie,Sheila Slaughter,1989-01-20 There is a real need for a clear analysis and investigation of what the crisis in teaching actually is By exploring the definition of the teaching crisis investigating the evidence for its existence and reforms proposed to solve it and

studying the possible effects of proposed reforms the authors of *Crisis in Teaching* address this need Their work constitutes one of the first sustained and critical analyses of teachers and teaching in the contemporary situation The authors among the nation's leading critical thinkers in the field of education reflect a variety of perspectives as they attempt to unravel the current rhetoric of crisis and question solutions that are in effect too often simplistic and superficial in their analyses and proposals

**The University and the Teachers** Harry Judge, Michel Lemosse, Lynn Paine, Michael Sedlak, 1994-01-01 Here is a book for our times a study in three countries of the relationship between teacher education and the universities An Englishman looks at France a Frenchman at the USA and two Americans at England with the whole introduced and rounded off by Harry Judge who was also the interlocutor of France It is a notable addition to the Oxford Studies in Comparative Education John Tomlinson Director of the Institute of Education University of Warwick The Times Educational Supplement this is an outstanding book on several levels it is a worthwhile read for audiences well beyond those directly involved in teacher education It will be of particular interest to researchers and students of comparative education At a time when politicians seem bent on importing educational practices from other countries it reminds us that there are no easy lessons to be learnt through international comparisons and that we cannot suppose that what is identified as good practice in one country can easily be imported elsewhere without taking into account the cultural context within which it is successful Marilyn Osborn University of Bristol Comparative Education The book is beautifully and engagingly written enlivened by the authors efforts to make sense of that which is foreign to their personal educational experiences The narratives are rich in detail and insights about the forms of teacher education and the cultural logic of their suitability The chapters provoke thought experiments of a kind that are suggestive of outcomes for university based teacher education if reforms currently proposed in one nation prove to be similar to long standing practices in the others Frank B Murray University of Delaware Comparative Education Review The work recorded in this book was undertaken over four years with support from the Spencer Foundation of Chicago and under the direction of Harry Judge of the University of Oxford Michel Lemosse teaches at the University of Nice and Lynn Paine Michael Sedlak at Michigan State University
