**British Government and Politics** Michael L. Mannin, 2010-01-16. This deeply informed text sets the government and politics of Britain firmly in the context of Britain's enduring membership in the European Union. Michael L. Mannin thoroughly applies the concept of Europeanization across the political system to explore how far change is a product of Britain's interdependent relationship with the EU. He shows how the EU's treaty relationships present new challenges to sovereign states, especially Britain, whose psyche has long revolved around iconic notions of Parliamentary sovereignty, imperial power, national independence and an assumed cultural homogeneity. Examining the cultural, economic and social background to Britain's twenty-first century politics, Mannin challenges some of the historical myths on which Britain's exceptionalism is founded. He then analyzes contemporary political institutions and processes in the context of Europeanization, as well as the impact of the EU on policy and policy making. Ideal for courses in British and European politics, this book breaks new ground in exploring the complex interdependence that the EU should bring to the study of European political systems.

*The British Government and the City of London in the Twentieth Century* Ranald Michie, Philip Williamson, 2004-10-21. The relationship between the British government and the City of London has become central to debates on modern British economic, political and social life. For some, the City's financial and commercial interests have exercised a dominant influence over government economic policy, creating a preoccupation with international markets and the strength of sterling, which impaired domestic industrial and social well-being. Others have argued that government seriously constricted financial markets, jeopardising Britain's most successful economic sector. This collection of essays was the first book to address these issues over the entire twentieth century. It brings together leading financial and political historians to assess the government-City relationship from several directions and by examination of key episodes. As such, it will be indispensable not just for the study of modern British politics and finance, but also for assessment of the worldwide problem of tensions between national governments and international financial centres.
