Loyd, 2014-04-01 *Health Rights Are Civil Rights* tells the story of the important place of health in struggles for social change in Los Angeles in the 1960s and 1970s Jenna M Loyd describes how Black freedom antiwar welfare rights and women s movement activists formed alliances to battle oppressive health systems and structural violence working to establish the principle that health is a right For a time with President Nixon big business and organized labor in agreement on national health insurance even universal health care seemed a real possibility *Health Rights Are Civil Rights* documents what many Los Angeles activists recognized that militarization was in part responsible for the inequalities in American cities This challenging new reading of suburban white flight explores how racial conflicts transpired across a Southland landscape shaped by defense spending While the war in Vietnam constrained social spending the New Right gained strength by seizing on the racialized and gendered politics of urban crisis to resist urban reinvestment and social programs Recapturing a little known current of the era s activism Loyd uses an intersectional approach to show why this diverse group of activists believed that democratic health care and ending war making were essential to create cities of freedom peace and social justice a vision that goes unanswered still today

Communities of Health Care Justice Charlene Galarneau, 2016-11-03 The factions debating health care reform in the United States have gravitated toward one of two positions that just health care is an individual responsibility or that it must be regarded as a national concern Both arguments overlook a third possibility that justice in health care is multilayered and requires the participation of multiple and diverse communities Communities of Health Care Justice makes a powerful ethical argument for treating communities as critical moral actors that play key roles in defining and upholding just health policy Drawing together the key community dimensions of health care and demonstrating their neglect in most prominent theories of health care justice Charlene Galarneau postulates the ethical norms of community justice In the process she proposes that while the subnational communities of health care justice are defined by shared place including those bound by culture religion gender and race that together they define justice As she constructs her innovative theorization of health care justice Galarneau also reveals its firm grounding in the work of real world health policy and community advocates Communities of Health Care Justice not only strives to imagine a new framework of just health care but also to show how elements of this framework exist in current health policy and to outline the systemic conceptual and structural changes required to put these justice norms into fuller practice
