Regeneration Of Woody Legumes In Sahel:

Regeneration of Woody Legumes in Sahel Knud Tybirk, 1991 *Regeneration of Woody Legumes in Sahel* *Woody Plants in Agro-Ecosystems of Semi-Arid Regions* Henk Breman, Jan-Joost Kessler, 2012-12-06 This book provides a quantitative analysis of the role of woody plants in semi arid regions for the assessment of their benefits in agro-sylvopastoral land use systems with productive and sustainability objectives The insights presented and conclusions drawn allow the additional benefits of woody plants for specific climatic and physical site conditions and land use systems to be estimated The Sahel and Sudan zones in West Africa on which the book focusses represent resource poor conditions whose ecological dynamics have been relatively well studied The role of woody plants in this region as assessed in this book is extrapolated to other semi arid regions leading to general conclusions on agroforestry's potential as an option for sustainable land use in semi arid regions The origins of this book go back to 1982 when the Club du Sahel requested that available data on woody plants in the Sahel region be synthesised to provide basic information to enable better attention to be given to woody plants in rural development programmes We are grateful to the Club du Sahel for this challenge Various people contributed to studies used in this book The preliminary inventory of the data available was made by Frits Ohler later his work was continued by Franciska Dekker

Land, the State and the Unfinished Decolonisation Project in Africa Chitonge, Horman, Mine, Yoichi, 2019-06-25 This book focuses on the work of one of the leading African scholars on the land question and agrarian transformation in Africa Sam Moyo It offers a critical discussion in conversation with Sam Moyo of the land question and the response of African states Since independence African states have been trying to address the colonial legacy on land policy and governance After six decades of formulating and implementing land reforms most countries have not succeeded in decolonising approaches to land policy and the administrative framework The book brings together the broader debates on the implications of decolonisation of Africa's land policy Through case studies from several African countries the book offers an empirical analysis on land reforms and the emerging land relations and how these affect land allocation and use including agricultural production Most of the chapters discuss how the unresolved land question in post colonial Africa impacts on agricultural production and rural development broadly The failure to decolonise colonial land policy and the imported tenure systems has left post colonial African states dancing to two tunes resulting in schizophrenic land and agrarian policies The book demonstrates that the failure by African states to reconcile imported and indigenous land tenure systems and practices is evident in the deliberate denigration of customary tenure It is also evident in the rising land inequality and the neglect of the agricultural sector the small scale and subsistence sub sectors in particular *Studies of Woody Flora and Vegetation in Senegal* J.
