Enright, 2016-11-21 Catholic Literature and Film Incarnational Love and Suffering is meant to be considered as a work of literary criticism not film adaptation studies In it the author explores six literary works dealing with Catholic themes and the film versions of these works The discussion of the films is at the service of analyzing the texts Underlying all the discussions is an incarnational sacramental view of the texts which links to my interpretation of the film versions of them Catholic and actually any Christian interpretation of literature or film or any other art form is rooted in an iconic and sacramental understanding of imagery as a means of conveying the sacred Catholic spirituality lends itself to this sort of approach as it is deeply rooted in the ability to see sacred things through physical means A key sub theme is romantic love in connection with salvation which Charles Williams one of the Inklings the group of British writers including J R R Tolkien and C S Lewis who met and discussed literature and theology calls the theology of romantic love as well as the sub themes of redemptive suffering and grace My interest in the book is not an analysis of cinematography per se but on the films as vehicles for religious ideas What makes this approach unique is that it doesn't deal with only faith and film as Peter Frazer does very well in his book Images of the Passion The Sacramental Mode in Film for example it also goes beyond the realm of strict literary criticism in its tackling of how religiously oriented works of literature are affected by the transformation into film

Topographies of Popular Culture Maarit Piipponen, Markku Salmel, 2016-08-17 Topographies of Popular Culture departs from the deceptively simple notion that popular culture always takes place somewhere By studying the spatial and topographic imaginations at work in popular culture the book identifies and illustrates several specific tendencies that deserve increased attention in studies of the popular In combining the study of popular texts with a broad variety of geographical contexts the volume presents a global and cross cultural approach to popular culture's topographies In part Topographies of Popular Culture takes its cue from recent theorisations of spatiality in the field of critical theory and from such global transformations

as the processes and after effects of decolonisation and globalisation It contemplates the spatiality of genre and the interactions between the local and the global as well as the increasing circulation and adaptation of popular texts across the globe The ten individual chapters analyse the spaces of popular culture at a scale that extends from an individual s everyday experience to genuinely global questions offering new theoretical and analytical insights into the relation between spatiality and the popular
