Olson,1984     **Scenes from the High Desert** Virginia Kerns,2010-10-01 If a religion cannot attract and instruct young people it will struggle to survive which is why recreational programs were second only to theological questions in the development of twentieth century Mormonism In this book Richard Ian Kimball explores how Mormon leaders used recreational programs to ameliorate the problems of urbanization and industrialization and to inculcate morals and values in LDS youth As well as promoting sports as a means of physical and spiritual excellence Progressive Era Mormons established a variety of institutions such as the Deseret Gymnasium and camps for girls and boys all designed to compete with more worldly attractions and to socialize adolescents into the faith Kimball employs a wealth of source material including periodicals diaries journals personal papers and institutional records to illuminate this hitherto underexplored aspect of the LDS church In addition to uncovering the historical roots of many Mormon institutions still visible today Sports in Zion is a detailed look at the broader functions of recreation in society     *South Asian Anthropologist* ,1985     Great Plains Quarterly ,1986     *Julian Huxley, Evolutionism and the History of Transhumanism* Ingrid Dunér,2025-03-18 The evolutionary biologist Julian Huxley 1887 1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley s transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of

transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable     The Design of Science, Evolution, the Environment, and Redemption Jim Keck, 2022-07-18 Don't send your kids off to college without this book especially if they will be engaged in the sciences or philosophy The Design of Science Evolution the Environment and Redemption will clarify the differences scientific basis and logical foundation for the two most dominating and competing worldviews we have adopted in western society nowadays namely science and religion After reading this book you will be able to better understand articulate and defend what you believe and why As a society in general we need to understand the basis of our morality and culture and how science and religion each have a role to play Just a few of the types of questions answered are Is there really competition and conflict between science and religion What is the technological and philosophical scope of science How does our worldview affect the development of morality and virtue both individually and collectively Do we really need to be concerned about global environmental changes Which type of worldview does the best job of providing answers to the tough questions on origin purpose environmental issues morality government and eternity Is a belief in God and the Bible part of the evolutionary process Written by a mechanical engineer with more than thirty years of design and R D experience The Design of Science Evolution the Environment and Redemption lays out in a clear concise easy to read and entertaining manner much of the science logic and data used by academia and the media to answer life's toughest questions as compared to the biblical Judeo Christian tradition This book explores how we can measure the truthfulness accuracy and scope of these worldviews and how they can affect us personally spiritually and culturally The answers are logically spiritually and technically robust as well as just plain surprising in many ways     *Book of Days* C.
