Loretta Lux:

Loretta Lux Wim van Sinderen,2004 **Loretta Lux** Loretta Lux,Stefan Schmid,2000 Loretta Lux Francine Prose,2005 Though the sense of realism in German photographer Loretta Lux s striking portraits of children remains eerily intact Lux does not strive to create faithful photographic representations of her young subjects Instead each image invariably comprised of a lone child in a sparse landscape is painstakingly composed and manipulated to create psychically charged explorations of the nature of childhood and the process of self discovery Originally trained as a painter Lux continues to draw influence from paintings by old masters such as Velasquez Goya and Runge This influence is especially apparent in Lux s compositions After carefully choosing the models costumes and backdrops sometimes using her own paintings she digitally combines and enhances each element to form meticulously structured tableaux The consistently forlorn expressions of her models combined with the hyperreality of the image create portraits that transcend their subjects and remind us that childhood is as chaotic and multidimensional as any other part of life *Train Your Gaze* Roswell Angier,2020-09-03 Focusing on the presence of the photographer s gaze as an integral part of constructing meaningful images Roswell Angier combines theory and practice to provide you with the technical advice and inspiration you need to develop your skills in portrait photography Fully updated to take into account advances in creative work and photographic technology this second edition also includes stunning new visuals and a discussion on the role of social media in the practice of portraiture Each chapter includes a practical assignment designed to help you explore various kinds of portrait photography and produce a range of different styles for your creative portfolio Loretta Lux Loretta Lux,Jorge Contreras,Jorge Contreras Chacel,Nina Zambrano,Museo de Arte Contemporáneo,2008 **American Photo** ,2005-05 *Photography and Germany* Andrés Mario Zervigón,2017-05-15 The idea of photography in Germany evokes everything from the pioneering modernist pictures of the Weimar era to the colossal digital prints that define art photography today But it also recalls horrifying documents of wartime atrocities and the relentless surveillance of East German citizens Photography and Germany broadens these perceptions by examining the medium s multi faceted relationship with Germany s turbulent cultural political and social history while rethinking the notion of German photography with fresh insights on its historical context Andr s Mario Zervig n covers this history from the region s pre photographic experiments with light sensitive chemicals to today s tension between analog and digital technologies Rather than simply providing a survey of German photography however he focuses on how the medium as a product of the modern age has intervened in a fraught project of national imagining often to productive ends but sometimes to catastrophic results Richly illustrated with numerous previously unpublished images Photography and Germany is the first single authored history of photography in Germany ever published one that deepens our broader understanding of how photography cultivates notions of a nation and its inhabitants **30-Second Photography** Brian Dilg,Adiva Koenigsberg,2015-05-11 Who invented photography first Fox Talbot or Louis Daguerre Who got the patent Who

made the most money Who are the greatest photographers and what have their contributions been This book takes the 50 most important aspects of photography both the major styles and the key technical aspects that make them possible and explains each in two pages 300 words and one picture The book also includes six profiles of the greatest names in the history of photography and shares their contributions Whether you pick it up for 30 seconds at a time or read it from cover to cover this book is guaranteed to have you thinking about your own and other people s photography in a whole new way

Van Gogh on Demand Winnie Wong, 2014-03-24 Unsettles contemporary art's unspoken hierarchies and topples modernist and postmodernist assumptions about originality, authenticity and authorship. *Reviews* In a metropolis in south China lies Dafen, an urban village that houses thousands of workers who paint van Goghs, Da Vincis, Warhols and other Western masterpieces for the world market, producing an astonishing five million paintings a year. Winnie Wong infiltrated this world, first investigating the work of conceptual artists, then working as a dealer, apprenticing as a painter, surveying wholesalers and retailers in Europe, East Asia and North America, establishing relationships with local leaders and organizing a conceptual art exhibition for the Shanghai World Expo. The result is *Van Gogh on Demand*, a fascinating book about a little known aspect of the global art world, one that sheds surprising light on the workings of art, artists and individual genius. Wong describes an art world in which migrant workers, propaganda makers, dealers and international artists make up a global supply chain of art. She examines how Berlin-based conceptual artist Christian Jankowski, who collaborated with Dafen's painters to reimagine the Dafen Art Museum, unwittingly appropriated the work of a Hong Kong-based photographer, Michael Wolf. She recounts how Liu Ding, a Beijing-based conceptual artist, asked Dafen assembly-line painters to perform at the Guangzhou Triennial, styling himself into a Dafen boss. Through such cases, Wong shows how Dafen's painters force us to reexamine our preconceptions about the role of Chinese workers in redefining global art. A fantastically detailed exploration of a topic which touches the heart of many of the issues surrounding China's economic rise. *South China Morning Post*

American Photo - ND, 2008-01 **Theories in Digital Composite Photographs** Yihui Huang, 2018-10-26 *Theories in Digital Composite Photographs* 12 Artists and Their Work presents a theoretical investigation of digital composite photographs through philosophical exploration of artists' concepts of reality. With an international cohort of contemporary digital composite artists, this book presents twelve case studies on artists' motivation, production process and the relation of their worldview to theoretical interpretation. Author Yihui Huang situates each artist's work in the context of photographic theory and western aesthetics, including realism, expressionism, formalism and postmodernism. As creation of digital composites grows in popularity and influence, this is the first to integrate a philosophical and theoretical understanding of this unique art form. Featuring a wide range of international artists, this volume is both insightful and inspirational for student and seasoned professional alike. **Photography** Trenton Hamilton, 2016-07-15 Photography is generally considered to have had its birth in 1839 when Louis Jacques Mandé Daguerre first revealed his photographic process to the public. Increasingly, cameras have become more automated and electronic over the years. In spite of the increasing sophistication of the equipment, however, the photographer's eye continues to be all important. Photography remains a unique human act. This compendium focuses on the technology of photography: the camera and its parts, types of lenses, shutters and speeds, films and filters, making photographs, exposing film, lighting, darkroom techniques and processing, printing photographs and some of
