

ENCUENTRO DE DOS MUNDOS

12 de octubre

El 12 de octubre se ha considerado como un día memorable porque a partir de entonces se inició el contacto entre Europa y América, que culminó con el llamado "encuentro de dos mundos", que transforma las visiones del mundo y las vidas tanto de europeos como de americanos.

A pesar de que Cristóbal Colón siempre pensó que había llegado a la India, su llegada al continente americano también sirvió para confirmar que la tierra no era plana, sino, redonda.

Fruteros Rocío Rosales, 2020-05-19 This book examines the social worlds of young Latino street vendors as they navigate the complexities of local and federal laws prohibiting both their presence and their work on street corners Known as fruteros they sell fruit salads out of pushcarts throughout Los Angeles and are part of the urban landscape Drawing on six years of fieldwork Rocío Rosales offers a compelling portrait of their day to day struggles In the process she examines how their paisano hometown compatriot social networks both help and exploit them Much of the work on newly arrived Latino immigrants focuses on the ways in which their social networks allow them to survive Rosales argues that this understanding of ethnic community simplifies the complicated ways in which social networks and social capital work Fruteros sheds light on those complexities and offers the concept of the ethnic cage to explain both the promise and pain of community

Reactive scattering for H- + H2 and H+ + H2 and its isotopologues Dequan Wang, 2016-07-15 The reactive scattering for H H2 and H H2 and its isotopologues were investigated using different methods The studies aimed at providing insights into elementary reactions and go beyond these to more complex chemical reactions By comparison of the reaction probabilities of H H2 using adiabatic and non adiabatic methods it was found that at low collision energies the reaction preferentially occurs adiabatically but at higher collision energies non adiabatic effects should be taken into account For H H2 and its isotopologues we can see that at low collision energies the reaction probabilities and reaction cross section using SM PES and AY PES are very similar but different from PS PES The reaction cross sections investigated with quasi classical trajectories are higher than those calculated with quantum wavepackets For the collision H and D with HD the main reaction path ways are different with the different collision energies

Children, Spaces and Identity Margarita Sánchez Romero, Eva Alarcón García, Gonzalo Aranda Jiménez, 2015-10-31 How do children construct negotiate and organize space The study of social space in any human group is fraught with limitations and to these we must add the further limits involved in the study of childhood Here specialists from archaeology history literature architecture didactics museology and anthropology build a body of theoretical and methodological approaches about how space is articulated and organized around children and how this disposition affects the creation and maintenance of social identities Children are considered as the main actors in historic dynamics of social change from prehistory to the present day Notions on space childhood and the construction of both the individual and the group identity of children are considered as a prelude

to papers that focus on analyzing and identifying the spaces which contribute to the construction of children's identity during their lives the places they live learn socialize and play A final section deals with these same aspects but focuses on funerary contexts in which children may lose their capacity to influence events as it is adults who establish burial strategies and practices In each case authors ask questions such as how do adults construct spaces for children How do children manage their own spaces How do people adults and children build invisible and or physical boundaries and spaces **Living the**
