### Resumen

Algunos investigadores sobre las asociaciones florísticas del Cretácico en México, crearon un panorama más completo de la flora en ese momento y de su evolución hasta la actualidad. Los autores revisan paleobotánicos contemporáneos existentes para el Cretácico basados estrictamente en contribuciones y no en registros o catálogos de microfósiles en Coahuila, Chiapas y Puebla, así como fragmentos de fósiles en Colima y Sonora y algunos paleoecológicos, realizados en los estados de Baja California, Durango y Michoacán. La falta de la revisión de datos para este período se debe principalmente a que en este tiempo la mayor parte de México perteneció a las Américas. Sin embargo, con los numerosos los trabajos de Flora fossil contribuyen así al Cretácico Mexicano principalmente en la Formación Ojoa (Colima), y un menor medida, por contribuciones de las Formaciones Cerro del Peñón (Coahuila), El Cofre (Baja California), Sierra Madre (Chiapas), Tuxtepec (Oaxaca), Grupo Colima (Sonora) y otros trabajos aislados realizados. En esta revisión también se incluyen especies de fósiles paleobotánicos de gran relevancia del Cretácico de México, incluyendo microfósiles del Cretácico en la localidad de El Chango (Chiapas) y fragmentos de macrófitas y microfitas en la localidad de Huapaco en la Sierrita de Colima (Sonora).

**Palabras clave:** Paleobotánica, paleoecología, Cretácico, México.

### Abstract

Some investigators of Cretaceous floristic assemblages in Mexico created a more complete picture of the flora at that time and its evolution up to the present. The review examines paleobotanical studies for the Early Cretaceous, mainly unpublished and not mentioned in microfossil studies in Colima, Chiapas and Puebla, as well as fragments of fossils in Coahuila and Sonora and paleoecological works in the states of Baja California, Durango and Michoacán. The reason for the paucity of data for this period is mainly due to the fact that at that time most of Mexico remained unexplored. In contrast, paleobotanical studies focused on the Late Cretaceous and more numerous and are mainly centered on the Ojoa Formation (Colima) and, to a lesser extent, there are studies from the Cerro del Peñón (Coahuila), El Cofre (Baja California), Sierra Madre (Chiapas), and Tuxtepec (Oaxaca) formations, the Colima Group (Sonora) and other isolated unpublished works. New contributions to the Cretaceous of Mexico are provided, mainly by contemporary microfossils from the locality of El Chango (Chiapas) and new macro- and microfossil records from Huapaco in Colima (Sonora).
