The Parables of Jesus Richard Q. Ford, In this startling new way to read the parables Ford unlocks seven of the longer parables attributed to Jesus He focuses on the two major characters in each parable who are separated by social inequality and he entirely bypasses the common approach that assumes that the superior character represents God and the subordinate character the Christian believer Drawing on his own therapeutic training Ford offers unique insight into the psychodynamics at work in the parables He proposes that the two characters are equally balanced in their multiple misperceptions of each other and shows how Jesus stories invite listeners to advert to issues of conflict and power and to struggle toward reconciliation

Beyond Reductionism Terry Wykowski, Neil Douglas, 2023-07-28 *Beyond Reductionism Gateways for Learning and Change* takes a critical look at organizational learning and change management from a leadership perspective in late 20th century organizations The authors argue that the dynamics that restrain the efforts of leaders transcend personal attributes and leadership styles They are rooted in the nature of work and institutions and the histories and cultures of the organizations themselves Often seen as the central constraint and the core limiting factor in organizational effectiveness and learning reductionism is defined as over simplification and a failure to comprehend the nature of life in organizations by concentrating too fully on discrete and disconnected aspects of reality The other constraints of hierarchy and institutional knowledge are activated and driven by reductionism After reading *Beyond Reductionism Gateways for Learning and Change* leaders at all organizational levels will understand why low levels of organizational learning persists and change efforts fail They will also be equipped to recognize and reject overly simplistic and superficial interventions helping them to create non reductionist strategies for creating and sustaining change Actual project designs experiences techniques and results are described in the book within an overall framework that emphasizes the roles and interconnectedness of individuals leaders and groups all operating within the overlay of culture

From Belief to Knowledge Neil Douglas, Terry Wykowski, 2010-09-08 Belief is not knowledge but we tend to hold our beliefs as if they represent knowledge selecting whatever evidence is required to justify them And because humans tend to cling to their beliefs as truths organizations often ignore the need for change no matter how urgent that need

Taking the Transference, Reaching Toward Dreams M. Gerard Fromm, 2018-03-08 This book reports on clinical work in and at the boundaries of the intermediate space between patient and therapist perhaps the space between reaching toward dreams and taking the transference Though the clinical work to be described here was influenced quite deeply by the writing of Winnicott primarily

and then of Lacan it is meant to stand for itself as the record of and a set of stories about one therapist's experiences and learning. The chapters that follow take up a range of clinical conditions: hopelessness, self-destructiveness, psychosis, clinical phenomena, regression, impasse, trauma, technical issues, interpretation, transference, free association and related topics, dreams, creativity, the analytic setting. Most of this work took place at the Austen Riggs Center, a small psychiatric hospital in Stockbridge, Massachusetts, in which quite troubled patients are offered intensive psychoanalytic psychotherapy in a completely open and voluntary therapeutic community setting.

The Evolution of the Unconscious Susan Long, 2025-02-12

Drawing on over four decades of professional and academic experience, Susan Long explores how the concept of the unconscious has evolved from the nineteenth to the twenty-first century, showing that it is more than an individual phenomenon but also a group, organisational and institutional phenomenon. Each chapter examines theories that use the idea of the unconscious, first covering the work of Schelling, Freud, Bion and Lacan. After examining traditional psychoanalytic ethos, the author takes a look at the mid-twentieth-century extension of the meaning of the unconscious towards the social field. Here she explores three main traditional categories of approaches: the Neo-Freudians, the Frankfurt School and social scientists, historians and anthropologists. The book also covers the idea of approaching the unconscious from the perspective of the neurosciences as well as its connections with nature, showing a broader, more cosmic view of the unconscious in nature and the universe. Lastly, Long looks at how we might understand today's organisations and society through the lens of the changing ideas presented throughout the book. Broad, sweeping and accessible, this book is a valuable resource for organisational psychologists, consultants and managers exploring psychoanalytic and socioanalytic approaches as well as those in academic settings wanting to pursue an interest in the unconscious.
