Eric R. Williams

Lost Moon The Perilous Voyage Of Apollo 13:

Lost Moon Jim Lovell, Jeffrey Kluger, 1994 The untold story of the American moon shot that almost ended in a fatal catastrophe told by the flight's commander offers a chronicle of courage heroism and adventure **Lost Moon** Jim Lovell, Jeffrey Kluger, 1997 **Apollo 13** James Lovell, Jeffrey Kluger, 2006-02-20 In April 1970 during the glory days of the Apollo space program NASA sent Navy Captain Jim Lovell and two other astronauts on America's fifth mission to the moon. Only fifty-five hours into the flight of Apollo 13 disaster struck a mysterious explosion rocked the ship and soon its oxygen and power began draining away. Written with all the color and drama of the best fiction APOLLO 13 previously published as *Lost Moon* tells the full story of the moon shot that almost ended in catastrophe. Minutes after the explosion the three astronauts are forced to abandon the main ship for the lunar module a tiny craft designed to keep two men alive for just two days. As the hours tick away the narrative shifts from the crippled spacecraft to Mission Control from engineers searching desperately for a way to fix the ship to Lovell's wife and children praying for his safe return. The entire nation watches as one crisis after another is met and overcome. By the time the ship splashes down in the Pacific we understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA's finest hour. Now thirty years after the launch of the mission Jim Lovell and coauthor Jeffrey Kluger add a new preface and never before seen photographs to *Apollo 13*. In their preface they offer an incisive look at America's waxing and waning love affair with space exploration during the past three decades culminating only recently when the Apollo 13 spacecraft itself long consigned to an aviation museum outside Paris was at last returned to its rightful home in the United States. As inspiring today as it was thirty years ago the story of Apollo 13 is a timeless tribute to the enduring American spirit and sparkling individual heroism **Apollo 13** Jim Lovell, Jeffrey Kluger, 2000 The story of the American moon shot that almost ended in a fatal catastrophe told by the flight's commander offers a chronicle of courage heroism and adventure Apollo 13 James Lovell, Jeffrey Kluger, 2019-02-12 NATIONAL BESTSELLER Astronaut Jim Lovell and coauthor Jeffrey Kluger's harrowing account of the Apollo 13 disaster. Serving as the basis for Ron Howard's blockbuster *Apollo 13* the book reveals true details not shown in the movie. Thrilling and evocative you feel as though you're alongside Lovell in the lunar module. Written with all the color and drama of the best fiction *Apollo 13* tells the full story of the moon shot that almost ended in catastrophe. Minutes after a mid-flight explosion the three astronauts are forced to abandon the main ship for the lunar module a tiny craft designed to keep two men alive for just two days. Judy L. Hasday, 2001 A biography of the young star of the movie E T who survived her troubled early years and has gone on to become a successful actress and movie producer The Apollo 13 Mission Donald B. Lemke, 2006 In graphic novel format tells the dramatic story of the rescue of the Apollo 13 astronauts **Danger in Space** Henry M. Holden, 2012-07-01 Soaring through space at 25 000 per hour Apollo 13 was on course for the Moon Suddenly the three astronauts aboard the spacecraft heard a loud bang A strong vibration rumbled through the crew cabin There had been an explosion in the oxygen tank More than 200 000 miles from Earth Apollo 13 was in grave danger The astronauts had planned to land on the Moon but now they had a new mission survival Author Henry M Holden delivers the gripping details of how three astronauts with the help of NASA scientists on Earth turned a story of disaster into one of triumph **Past Imperfect** Mark C. Carnes, 1996-11-15 Essays that consider how classic movies have reflected history include the writings of such noted historians as Paul Fussell Antonia Fraser and Gore Vidal *Front Burner* Kirk Lippold, 2012-04-10 On October 12 2000 eleven months before the 9 11 attacks the USS Cole docked in the port of Aden in Yemen for a routine fueling stop At 1118 on a hot sunny morning the 8 400 ton destroyer was rocked by an enormous explosion The ship s commander Kirk Lippold felt the ship violently thrust up and to the right as everything not bolted down seemed to float in midair Tiles tumbled from the ceiling and the ship was plunged into darkness beginning to sink In a matter of moments Lippold knew that the Cole had been attacked What he didn t know was how much the world was changing around him The bombing of the Cole was al Qaeda s first direct assault against the United States and expanded their brazen and deadly string of terrorist attacks throughout the Middle East In this gripping first person narrative Lippold reveals the details of this harrowing experience leading his crew of valiant sailors through the attack and its aftermath Seventeen sailors died in the explosion and thirty seven were wounded but thanks to the valor of the crew in the perilous days that followed the ship was saved Yet even with al Qaeda s intentions made clear in an unmistakable act of war the United States government delayed retaliating Bureaucrats and politicians sought to shift and pin blame as they ignored the danger signaled by the attack shirking responsibility until the event was ultimately overshadowed by 9 11 *Front Burner* captures a critical moment in America s battle against al Qaeda telling a vital story that has until now been lost in the fog of the war on terror Astronauts Giles Sparrow, 2006 Discusses the race for space and the astronauts who were involved The Emergence and Scope of the Voice of Government Mordecai Lee, 2023-03-21 Nowadays we all tend to be annoyed by bureaucracy and by propaganda if only because both touch our daily lives This book examines the intersection of those two subjects external communications emanating from government agencies When bureaucracies communicate with us directly or via the news media are we being bombarded with self serving propaganda or with helpful information to improve our lives Perhaps it is a mash up of both purposes This book examines the scope uses and history of government communications Topics of discussion include digital government disaster communication relations between the media and government agency spokespersons democratic reporting to the citizenry wartime public relations PR and how US

presidents and the US Congress treated bureaucratic PR. Several chapters are historical case studies such as about an astronaut who became US Assistant Secretary of State for Public Affairs. In addition, two chapters examine President Nixon's record while in a more light-hearted vein, another presents the pop culture image of government spokespersons in movies. The book concludes with the origins of the academic study of external communications in public administration.

The Screenwriters Taxonomy Eric R. Williams, 2017-09-05 In *The Screenwriters Taxonomy*, award-winning screenwriter and educator Eric R. Williams offers a new collaborative approach for creative storytellers to recognize, discuss, and reinvent storytelling paradigms. Williams presents seven different aspects of storytelling that can be applied to any fictional narrative film, from super genre macrogenre and microgenre to voice and point of view, allowing writers to analyze existing films and innovate on these structures in their own stories. Moving beyond film theory, Williams describes how this roadmap for creative decision making can relate to classics like *Sunset Boulevard*, *The Wizard of Oz*, and *Butch Cassidy and the Sundance Kid*, as well as such diverse modern favorites like *12 Years a Slave*, *Anomalisa*, and *Shrek*.

Calculated Risk George Leopold, 2016-06-15 Unlike other American astronauts, Virgil I. Gus Grissom never had the chance to publish his memoirs. Killed along with his crew in a launch pad fire on January 27, 1967, Grissom also lost his chance to walk on the moon and return to describe his journey. Others went in his place. The stories of the moon walkers are familiar. Less appreciated are Grissom's contributions. The international prestige of winning the Moon Race cannot be understated, and Grissom played a pivotal and enduring role in securing that legacy for the United States. Indeed, Grissom was first and foremost a Cold Warrior, a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon. Drawing on extensive interviews with fellow astronauts, NASA engineers, family members, and friends of Gus Grissom, George Leopold delivers a comprehensive and corrective account of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight. *Calculated Risk: The Supersonic Life and Times of Gus Grissom* adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history.

Selecting the Mercury Seven Colin Burgess, 2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism. This work provides biographical details of all thirty-two finalists for the seven coveted places as America's pioneering astronauts. All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities. Most had served as wartime fighter and bomber pilots; some were test pilots on top secret and sophisticated aviation projects while others were fleet admirals, prisoners of war, and proposed pilots for spaceflight programs such as the Dyna Soar X-20. The names of all 32 finalists have been kept secret until very recently. *Selecting the Mercury Seven* also relates the history and difficulties behind the initial choice of candidates. The lives, motivations, military careers, and achievements of the unsuccessful twenty-five finalists are explored first in fully authorized biographies. Test pilots for the U.S. Navy, Air Force, and Marine Corps, each man has a fascinating and very different story to

tell All thirty two men had to endure meticulous demeaning and brutal week long medical examinations at the Lovelace Clinic in New Mexico This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio where they were subjected to extreme fitness and physiological testing the sole purpose of which was to sort out the Supermen from the near supermen The final part of the book examines the accomplishments and spaceflights of the seven successful candidates bringing their amazing stories right up to date
