Silent Sorrows: Let's Talk About Abortion, Reproductive Technologies, and Adoption

Katherine Breckenridge, 2024-05-15 Today's self indulgent society is one in which satisfying one's desires at the expense of others prevails This mindset is particularly common in areas of procreation such as abortion and various assisted reproductive technologies Through a lens that combines Christianity natural law and scientific reason this book discusses how the breakdown of man woman marriage biological connection the destruction and disregard for human life and the objectification and commodification of women and children manufactures trauma in not only adults but in children This trauma is evidenced by the stories of adult children who are victims of society's current cultural trends as well as evidenced by the research of various psychologists sociologists and other professionals For too long adults have been asking children to conform to their ways of living assuming children will just get over it and children are now starting to speak out about the harms of their upbringings It's essential to illuminate their voices as these familial breakdowns have become so normal that we currently can't talk about any of their negative aspects with any degree of common sense

Unlocking the Past Gill Pugh, 2019-09-16 Published in 1999 this text explores the

impact of access to child care records specifically upon adults who grew up in the care of Barnardo's. Most of the adults studied had reached their middle years with little or no knowledge of their family background or reasons for admission to care. The book researches the links between quality of care in childhood and the intensity of need to know about origins in later life. It looks at the complex process of assimilating information and the need for such information to be imparted with skillful judgement and sensitivity. The implications for service provision for those seeking access to their records is highlighted as well as for current child care practitioners. Requests for access to care records at Barnardo's have grown from around 1500 a year prior to 1995 to several thousand in one month alone following media publicity about the opening up of Barnardo's records. Other organizations are just beginning to recognize the growing demands for this service. This text aims to use these studies to examine the impact particularly upon sense of identity of ignorance about one's origins and the effects of acquiring such information later in life.
