History of Science Policy in the United States, 1940-1985 , 1986 **Future Survey Annual 1985** Michael

Marien, 1987-01-01 **American Science Policy since World War II** Bruce Smith, 2011-02-01 Just after the close of World War II America s political and scientific leaders reached an informal consensus on how science could best serve the nation and how government might best support science The consensus lasted a generation before it broke under the pressures created by the Vietnam War Since then the nation has struggled to reestablish shared beliefs about the means and goals of science policy In American Science Policy Since World War II author Bruce L R Smith makes sense of the break between science and government and identifies the patterns on postwar science affairs He explains that what might otherwise seem to be a miscellaneous set of separate episodes actually constituted a continuing debate of national importance that was closely linked to broad political and economic trends Smith s precise and unique analysis gives both the scholar and historian a better understanding of where we are and how we got there while casting a modest light on future policy directions **U.S.**

Government Publication John Spencer Walters, 2005-02-09 Examines the forces that have deflected U S Government publication from becoming the public enterprise that Congress had conceived in the nineteenth century Walters covers everything from the deeply embedded ideas of the American political consciousness and its inhibitive effect on the production distribution preservation and quality of U S Government documents to reasons why the executive department circumvented the U S Government Printing Office to the causes behind the conspicuous lawlessness of government publication to how the folkways of science served to constrict the sphere of government publication to a narrow strip Strategic Computing Alex Roland, Philip Shiman, 2002 The story of the U S Department of Defense s extraordinary effort in the period from 1983 to 1993 to achieve machine intelligence **NIST Special Publication** ,2000 **Recent Library Additions** ,1985 *Where Darwin Meets the Bible* Larry Witham, 2005 *Where Darwin Meets the Bible* provides an account of the lasting conflict between creationists and evolutionists **NASA Technical Memorandum** ,1991 **Peerless Science** Daryl E. Chubin, Edward J. Hackett, 1990-07-05 This book examines the structure and operation of peer review as a family of quality control mechanisms and looks at the burdens placed on the various forms of peer review Assuming that peer review is central to the functioning of U S science policy Chubin and Hackett explore the symbolic and practical value of peer review in the making implementing and analysis of this policy **Living in the Labyrinth of Technology** Willem H. Vanderburg, 2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity s second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg s *Living in the Labyrinth of Technology* seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity s third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people s minds and society s cultures thereby re creating human life in the image of technology *Living in the Labyrinth of Technology* argues that the twenty first century will be dominated by this pattern

General Accounting Office,1987 **A Final Story** Nasser Zakariya,2017-11-14 Popular science readers embrace epics the sweeping stories that claim to tell the history of all the universe from the cosmological to the biological to the social And the appeal is understandable in writing these works authors such as E O Wilson or Steven Weinberg deliberately seek to move beyond particular disciplines to create a compelling story weaving together natural historical events scientific endeavor human discovery and contemporary existential concerns In *A Final Story* Nasser Zakariya delves into the origins and ambitions of these scientific epics from the nineteenth century to the present to see what they reveal about the relationship between storytelling integrated scientific knowledge and historical method While seeking to transcend the perspectives of their own eras the authors of the epics and the debates surrounding them are embedded in political and social struggles of their own times struggles to which the epics in turn respond In attempts to narrate an approach to a final true account these synthesizing efforts shape and orient scientific developments old and new By looking closely at the composition of science epics and the related genres developed along with them we are able to view the historical narrative of science as a form of knowledge itself one that discloses much about the development of our understanding of and relationship to science over time [Common Pain Conditions - E-Book](#) Marc S.
