Voegelin examines a vast range of thought and issues of the age From the more obvious thinkers to those less frequently studied this volume features such figures as Calvin Althusius Hooker Bracciolini Savonarola Copernicus Tycho de Brahe and Giordano Bruno Devoting a considerable amount of attention to Jean Bodin Voegelin presents him as a prophet of a new true religion amid the civilizational disorder of the post Christian era Focusing on such traditional themes as monarchy just war theory and the philosophy of law this volume also investigates issues within astrology cosmology and mathematics Religion and the Rise of Modernity is a valuable work of scholarship not only because of its treatment of individual thinkers and doctrines influential in the sixteenth century and beyond but also because of its close examination of those experiences that formed the modern outlook
