political science and philosophy By retrieving early modern arguments for the civilizing effects of mixture Schmidgen invites us to rethink the stories we tell about the development of modern society Not merely the fruit of postmodernism the theorization and valuation of hybridity have their roots in centuries past

**Magic** Jesper Sørensen,2007 Magic is a universal phenomenon Everywhere we look people perform ritual actions in which desirable qualities are transferred by means of physical contact and objects or persons are manipulated by things of their likeness In this book S rensen embraces a cognitive perspective in order to investigate this long established but controversial topic Following a critique of the traditional approaches to magic and basing his claims on classical ethnographic cases the author explains magic s universality by examining a number of recurrent cognitive processes underlying its different manifestations He focuses on how power is infused into the ritual practice how representations of contagion and similarity can be used to connect otherwise distinct objects in order to manipulate one by the other and how the performance of ritual prompts representations of magical actions as effective Bringing these features together the author proposes a cognitive

theory of how people can represent magical rituals as purposeful actions and how ritual actions are integrated into more complex representations of events This explanation in turn yields new insights into the constitutive role of magic in the formation of institutionalised religious ritual

**Peptides** James P. Tam, Pravin T.P. Kaumaya, 2006-04-11 The Fifteen American Peptide Symposium 15APS was held in Nashville Tennessee on June 14 19 1997 This biennial meeting was jointly sponsored by the American Peptide Society and Vanderbilt University The attendance of 1 081 participants from 37 countries was lower than the two previously held Symposia However the number of participating countries was the largest Thus it was gratifying to see that this meeting retained both its international flavor and participant loyalty at a time when there are many more symposia held each year on similar subjects The scientific program thanks to the insights and efforts of the Program Committee as well as Dr Peter Schiller the President of the American Peptide Society was extraordinarily rich diverse and exciting It was comprised of 124 oral and 550 poster presentations Three prominent format changes were installed First the Symposium started on Saturday instead of Sunday Second the program opened on Saturday afternoon with a Mini symposium by the Young Investigators to give them an early start and attention Finally 40 short and definitive reports were given in two parallel sessions The expanded format permitted an unprecedented number of lectures and enabled wider participation by the attending delegates
