Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large **Monographic Series** Library of Congress, 1979 The Crusades, Christianity, and Islam Jonathan Riley-Smith, 2011 Claiming that many in the West lack a thorough understanding of crusading Jonathan Riley-Smith explains why and where the Crusades were fought identifies their architects and shows how deeply their language and imagery were embedded in popular Catholic thought and devotional life *Art and Technics* Lewis Mumford, 2000 Lewis Mumford was the author of more than thirty influential books many of which expounded his views on the perils of urban sprawl and a society obsessed with technics This text provides the essence of Mumford's views on the distinct yet interpenetrating roles of technology and the arts in modern culture Bulletin of the Atomic Scientists, 1969-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world AAAS Science Book List, 1978-1986 Kathryn Wolff, Susan M.
