Philosophical Hermeneutics and the Priority of Questions in Religions Nathan Eric Dickman,2022-02-24 Buddhas gods prophets and oracles are often depicted as asking questions But what are we to understand when Jesus asks Who do you say that I am or Mazu the Classical Zen master asks Why do you seek outside Is their questioning a power or weakness Is it something human beings are only capable of due to our finitude Is there any kind of question that is a power Focusing on three case studies of questions in divine discourse on the level of story the god depicted in the Jewish Bible the master Mazu in his recorded sayings literature and Jesus as he is depicted in canonized Christian Gospels Nathan Eric Dickman meditates on human responses to divine questions He considers the purpose of interreligious dialogue and the provocative kind of questions that seem to purposefully decenter us drawing on methods from confessionally oriented hermeneutics and skills from critical thinking He allows us to see alternative ways of interpreting religious texts through approaches that look

beyond reading a text for the improvement of our own religion or for access to some metaphysically transcendent reality This is the first step in a phenomenology of religions that is inclusive diverse relevant and grounded in the world we live in

Human Factors in Simple and Complex Systems, Second Edition Robert W. Proctor, Trisha Van Zandt, 2008-04-22 In terms of simple and complex systems it is a whole new world out there At the initial publication of this book fourteen years ago the web was in its infancy DVDs did not exist cell phones were few and far between and the information superhighway was just a blip upon the horizon If you used the terms social engineering you were most likely a political scientist and if you were phishing you might be listening to a rock band The second edition of a bestseller Human Factors in Simple and Complex Systems provides the necessary understanding of the breadth and depth of human factors issues that influence the design implementation and evaluation of products and systems Emphasizing the close relationship between basic theory and application the authors delineate a framework for the research process present an integrated view of the current state of knowledge and examine how these factors can be applied to system design The new edition addresses such concepts as situation awareness and highlights topics of interest with a special focus on computer applications and human computer interaction See what's new in the Second Edition New topics such as situational awareness that capture the tremendous changes in human factors and ergonomics Tightly integrates basic research and application strengthening the link between knowledge and practice Each chapter includes a separate box that discusses a topic of current interest related to human interaction with computers and recent technology Demonstrating a general approach to solving a broad range of system problems the book provides coverage of the theoretical foundation on which the discipline of human factors is built Structured around human information processing it covers the full range of contemporary human factors and ergonomics then shows you how to apply them
