Magistracy and the Historiography of the Roman Republic Ayelet Haimson Lushkov, 2015-02-09 The study of Roman republican magistracy has traditionally been the preserve of historians posing constitutional and prosopographical questions As a result one fundamental aspect of our most detailed contemporary and near contemporary sources about magistracy has remained largely neglected their literariness This book takes a new approach to the representation of magistrates and shows how the rhetorical and formal features of prose texts principally Livy's history but also works by Cicero and Sallust shape our understanding of magistracy Applying to the texts an expanded concept of exemplarity Haimson Lushkov shows how a rich body of anecdotes concerning the behaviour and speech of magistrates reflects on the values and tensions that defined the republic A variety of contexts familial military and electoral among others flesh out the experience of being becoming and encountering a Roman magistrate and the political and ethical problems highlighted and negotiated in such circumstances

Commanders and Command in the Roman Republic and Early Empire Fred K. Drogula, 2015-04-13 In this work Fred Drogula studies the development of Roman provincial command using the terms and concepts of the Romans themselves as reference points Beginning in the earliest years of the republic Drogula argues

provincial command was not a uniform concept fixed in positive law but rather a dynamic set of ideas shaped by traditional practice. Therefore as the Roman state grew concepts of authority control over territory and military power underwent continual transformation. This adaptability was a tremendous resource for the Romans since it enabled them to respond to new military challenges in effective ways. But it was also a source of conflict over the roles and definitions of power. The rise of popular politics in the late republic enabled men like Pompey and Caesar to use their considerable influence to manipulate the flexible traditions of military command for their own advantage. Later Augustus used nominal provincial commands to appease the senate even as he concentrated military and governing power under his own control by claiming supreme rule. In doing so he laid the groundwork for the early empire's rules of command. **A Companion to Livy** Bernard

Republic 146 to 44 BC Catherine Steel, 2013-03-05 In 146 BC the armies of Rome destroyed Carthage and emerged as the decisive victors of the Third Punic War. The Carthaginian population was sold and its territory became the Roman province of Africa. In the same year and on the other side of the Mediterranean Roman troops sacked Corinth the final blow in the defeat of the Achaean conspiracy thereafter Greece was effectively administered by Rome. Rome was now supreme in Italy the Balkans Greece Macedonia Sicily and North Africa and its power and influence were advancing in all directions. However not all was well. The unchecked seizure of huge tracts of land in Italy and its farming by vast numbers of newly imported slaves allowed an elite of usually absentee landlords to amass enormous and conspicuous fortunes. Insecurity and resentment fed the gulf between rich and poor in Rome and erupted in a series of violent upheavals in the politics and institutions of the Republic. These were exacerbated by slave revolts and invasions from the east. *Consuls and Res Publica* Hans

Beck, Antonio Duplá, Martin Jehne, Francisco Pina Polo, 2011-09-08 The consulate was the focal point of Roman politics. Both the ruling class and the ordinary citizens fixed their gaze on the republic's highest office to be sure from different perspectives and with differing expectations. While the former aspired to the consulate as the defining magistracy of their social status the latter perceived it as the embodiment of the Roman state. Holding high office was thus not merely a political exercise. The consulate prefigured all aspects of public life with consuls taking care of almost every aspect of the administration of the Roman state. This multifaceted character of the consulate invites a holistic investigation. The scope of this book is therefore not limited to political or constitutional questions. Instead it investigates the predominant role of the consulate in and its impact on the political culture of the Roman republic. **A Companion to the Political Culture of the**

Sampson, 2020-01-31 This in depth chronicle examines the series of political upheavals that led to division violence and civil war in the ancient Roman Republic The last century of the Roman Republic saw the consensus of the ruling elite shattered by a series of high profile politicians who proposed political or social reform programs many of which culminated in acts of bloodshed on the streets of Rome itself This began in 133 BC with the military recruitment reforms of Tiberius Gracchus which saw him and his supporters lynched by a mob of angry Senators Gracchus s grim example was followed by a series of radical politicians each with their own agenda that challenged the status quo of the Senatorial elite Each met a violent response from elements of the ruling order leading to murder and even battles on the streets of Rome These bloody political clashes paralyzed the Roman state

eventually leading to its collapse Covering the period 133 70 BC this volume analyzes each of the key reformers what they were trying to achieve and how they met their end narrating the long decline of the Roman Republic into anarchy and civil war

On the Way to Statehood Peter Radan,2017-05-15 The present international order is characterized by the rapid globalization of economic activity by systematic attempts to coordinate state responses to the outbreaks of violence and by unilateral military interventions against sovereign states either by the USA or by one of its regional allies This collection explores the changes that the current international order has brought to the theory and practice of recognition of secessionist claims and to the conditions for secessionist mobilization The volume examines how independence movements achieve legitimacy amongst both their target populations and outside states and how the forces of increasing economic globalization and political interdependence impact on secessionist mobilization It addresses how the outside states recognize the independence of new states and whether the claims to independent statehood can be justified within normative theories of secession and international law These issues are explored both through comparative analysis within legal international relations and political science frameworks and through an examination of several recent attempts at secession

Canon Law and Episcopal Authority Christopher W. B. Stephens,2015-05-21 Christopher Stephens focuses on canon law as the starting point for a new interpretation of divisions between East and West in the Church after the death of Constantine the Great He challenges the common assumption that bishops split between Nicenes and non Nicenes Arians or Eusebians Instead he argues that

questions of doctrine took second place to disputes about the status of individual bishops and broader issues of the role of ecclesiastical councils the nature of episcopal authority and in particular the supremacy of the bishop of Rome Canon law allows the author to offer a fresh understanding of the purposes of councils in the East after 337 particularly the famed Dedication Council of 341 and the western meeting of the council of Serdica and the canon law written there which elevated the bishop of Rome to an authority above all other bishops Investigating the laws they wrote the author describes the power struggles taking place in the years following 337 as bishops sought to elevate their status and grasp the opportunity for the absolute form of leadership Constantine had embodied Combining a close study of the laws and events of this period with broader reflections on the nature of power and authority in the Church and the increasingly important role of canon law the book offers a fresh narrative of one of the most significant periods in the development of the Church as an institution and of the bishop as a leader
