Barnothy,2012-12-06 We define biomagnetism broadly as the science of processes and functions in living organisms induced by static magnetic fields Biomagnetic research has greatly increased since the publication of the first volume of this series While much of this work has been reported in various international journals there exists a need for this work to be collected together in one place This book covers a rather wide area of research both with respect to the strength of the field ranging from zero to 150 000 oersteds and with respect to the various specimens and their biological functions It is designed primarily to help clarify the action of magnetic fields on biological systems with the hope of achieving a better understanding of the fundamental physiological processes occurring in them In some chapters it is suggested that magnetic fields could ultimately be used in the treatment of disease I would like to take this occasion to thank the contributors for their generous interest and willing cooperation M F B June 1969 Chicago Illinois v CONTRIBUTORS Robert A Abler Varian Associates Palo Alto California page 1 M M Alexandrovskaya Institute of Higher Nervous Activity and Neuro physiology Academy of Sciences Moscow USSR page 215 Jena M Barnothy Biomagnetic Research Foundation Evanston Illinois page 61 Madeleine F Barnothy
