Main Currents of Marxism Leszek Kołakowski,1978 **Modes of Production and Archaeology** Robert M. Rosenswig,Jeremy J. Cunningham,2017-05-15 This volume challenges the historical materialistic non capitalist modes that are used by archaeologists as not all that useful and instead considers how social labor is organized to transform nature into culturally refined and useful resources and how this can either maintain or change a culture Rather than describe what a society is using the theoretical framework of Marx and materialism a mode of production approach explores what a society does in a more dynamic sense *Handbook of Critical Psychology* Ian Parker,2015-04-17 Choice Recommended Read Critical psychology has developed over time from different standpoints and in different cultural contexts embracing a variety of perspectives This cutting edge and comprehensive handbook values and reflects this diversity of approaches to critical psychology today providing a definitive state of the art account of the field and an opening to the lines of argument that will take it forward in the years to come The individual chapters by leading and emerging scholars plot the development of a critical perspective on different elements of the host discipline of psychology The book begins by systematically addressing each separate specialist area of psychology before going on to consider how aspects of critical psychology transcend the divisions that mark the discipline The final part of the volume explores the variety of cultural and political standpoints that have made critical psychology such a vibrant contested terrain of debate The Handbook of Critical Psychology represents a key resource for researchers and practitioners across all relevant disciplines It will be of particular interest to students and researchers in psychology psychosocial studies sociology social anthropology and cultural studies and to discourse analysts of different traditions including those in critical linguistics and political theory *Mass Education, Global Capital, and the World* T. Griffiths,R. Imre,2013-12-18 By presenting a series of intricate analyses of educational phenomena through the theoretical lenses offered by Immanuel Wallerstein and István Mészáros the book engages readers and helps them to critically analyze their own participation in the global economy as citizens policy makers and academics or teachers *Main Currents of Marxism: The founders* Leszek Kołakowski,1978 *Rationality Standards of Social Life* Zbigniew Drozdowicz,2013 The standards of rationality are treated in this book as certain regulators of social life They are compared to the rudders of the great vessels constituted by social communities The diversity exhibited by those standards do not only result from the differences of time and space of their implementation but also from the differences in the sets of ideas put forward by the leading social thinkers accompanied by the different characteristics of their designated audiences Series Development in Humanities Vol 7 *The Political Economy of Marx (2nd Edition)* Michael Charles Howard,1988-09 This edition of The political economy of Marx Second edition is published by arrangement with Longman Group UK Limited T p verso

Cognition and Practice Rafal Banka,2022-07-01 This is the first book on the role of cognition in the aesthetic theory of Li Zehou 1930 2021 one of China's most important and influential contemporary philosophers The cognitive dimension and

its integration with practice is discussed by examining one of Li's pivotal concepts: subjectivity, a human subject shaped by the world in which they live, including beauty and aesthetic experience. Li's theory is also contextualized in the threefold inspiration coming from Confucian, Kantian, and Marxist philosophies, which differently conceptualize the aesthetic and cognitive dimensions in humans. By referring to different aesthetic theories and interdisciplinary approaches to cognition, the book aims to show how Li's cognitively oriented project can contribute to contemporary research into aesthetics. Although primarily written for philosophers working in aesthetics, Chinese and comparative philosophy, the book is also addressed to anyone interested in contemporary Chinese thought.

Fire in the Minds of Men James H. Billington, 1999 This book traces the origins of a faith, perhaps the faith of the century. Modern revolutionaries are believers no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries, the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims, with considerable evidence, that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors: people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared, *The New Republic* hailed it as remarkable, learned, and lively, while *The New Yorker* noted that Billington pays great attention to the lives and emotions of individuals, and this makes his book absorbing. It is an invaluable work of history and contribution to our understanding of political life.

The House in the Garden John Randolph, 2018-07-05 Aspiring thinkers require a stage for their performance and an audience to help give their actions distinction and meaning. To be made durable and influential, their charismatic stories have to be framed by supporting ideals, practices, and institutions. Although the biographies of the Empire's most famous thinkers have a comfortable platform in modern Russia's printed record, scholars have yet to explore fully the intimate context surrounding their activities in the early nineteenth century. There is, as a result, a certain homeless quality to our understandings of Imperial Russian culture, which this history of one extremely productive home will help us correct from. *The House in the Garden* explores the role played by domesticity in the making of

Imperial Russian intellectual traditions It tells the story of the Bakunins a distinguished noble family who in 1779 chose to abandon their home in St Petersburg for a rustic manor house in central Russia s Tver Province At the time the Russian government was encouraging its elite subjects to see their private lives as a forum for the representation of imperial virtues and norms Drawing on the family s vast archive Randolph describes the Bakunins attempts to live up to this ideal and to convert their new home Priamukhino into an example of modern civilization In particular Randolph shows how the Bakunin home fostered the development of a group of charismatic young students from Moscow University who in the 1830s sought to use their experiences at Priamukhino to reimagine themselves as agents of Russia s enlightenment Some of the story Randolph tells is familiar to historians The anarchist Mikhail Bakunin whose early philosophical evolution Randolph describes was born at Priamukhino while the radical critic Vissarion Belinsky claimed to have been transformed by his experiences there When Tom Stoppard sought to portray the spiritual history of the Russian intelligentsia in his trilogy *The Coast of Utopia* he chose Priamukhino as the scene for act 1 Yet Randolph s research allows us to watch this drama from a radically different perspective It shows how the culture of Russian Idealism so long presumed to be a product of alienation actually relied on the support provided by the cult of distinction that the Russian government had built around noble homes It also allows us to see the other actors and agents of private life and most notably the Bakunin women as participants in the creation of modern Russian social thought The result is a work that revises our understanding of Russian intellectual history while also contributing to the histories of women gender private life and memory in nineteenth century Russia

Nineteenth-Century Philosophy John Shand, 2019-04-16 Investigate the challenging and nuanced philosophy of the long nineteenth century from Kant to Bergson Philosophy in the nineteenth century was characterized by new ways of thinking a desperate searching for new truths As science art and religion were transformed by social pressures and changing worldviews old certainties fell away leaving many with a terrifying sense of loss and a realization that our view of things needed to be profoundly rethought The Blackwell Companion to Nineteenth Century Philosophy covers the developments setbacks upsets and evolutions in the varied philosophy of the nineteenth century beginning with an examination of Kant's Transcendental Idealism instrumental in the fundamental philosophical shifts that marked the beginning of this new and radical age in the history of philosophy Guiding readers chronologically and thematically through the progression of nineteenth century thinking this guide emphasizes clear explanation and analysis of the core ideas of nineteenth century philosophy in an historically transitional period It covers the most important philosophers of the era including Hegel Fichte Schopenhauer Mill Kierkegaard Marx Nietzsche Bradley and philosophers whose work manifests the transition from the nineteenth century into the modern era such as Sidgwick Peirce Husserl Frege and Bergson The study of nineteenth century philosophy offers us insight into the origin and creation of the modern era In this volume readers will have access to a thorough and clear understanding of philosophy that shaped our world

North Korean Ideology Thomas Stock, Humboldt Foundation Postdoctoral Fellow Thomas Stock, 2025-07-31 This book is the first ever Cold War history of North Korean ideology tracing its development from Soviet Marxism Leninism to the distinct North Korean ideology of today

The Concept of Affectivity in Early Modern Philosophy Ádám Smrcz, Maximilian Kiener, Jan Forsman, Hanna Vandenburg, Davide Monaco, Filip Buyse, Keith Green, Brian Glenney, Christopher Davidson, Zolt Bagi, Dávid Bartha, Dan O'Brien, Hans D. Muller, Csaba Olay, 2017-09-01 There is no need to argue for the relevance of affectivity in early modern philosophy When doing research and conceptualizing affectivity in this period we hope to attain a basic interpretive framework for philosophy in general one that is independent of and cutting across such unfruitful divisions as the time honored interpretive distinction between rationalists and empiricists which we consider untenable when applied to 17th century thinkers Our volume consists of papers based on the contributions to the First Budapest Seminar in Early Modern Philosophy held on 14-15 October 2016 at Eötvös Loránd University Budapest When composing this volume our aim was not to present a systematic survey of affectivity in early modern philosophy Rather our more modest goal was to foster collaboration among researchers working in different countries and different traditions Many of the papers published here are already in implicit or explicit dialogue with others We hope that they will generate more of an exchange of ideas in the broader field of early modern scholarship

The Anthropology of Johannes Scottus Eriugena Willemien Otten, 1991 This book deals with Eriugena's view of man in the context of his thinking on universal nature Although man is seen as possessing a sinful created state this does not prevent him from entertaining a free and direct relationship with God and the surrounding universe It is

shown that while man is governed by nature's unfolding he can also exercise significant control over it **Karl Marx's Ecosocialism** Kohei Saito, 2017-10-24 Delving into Karl Marx's central works as well as his natural scientific notebooks published only recently and still being translated the author argues that Karl Marx actually saw the environment crisis embedded in capitalism. The book shows us that Marx has given us more than we once thought that we can now come closer to finishing Marx's critique and to building a sustainable ecosocialist world. Page 4 of cover
