R.,2010-01-01 Sub Saharan Africa is one of the poorest regions of the world Because most Africans work in agriculture escaping such dire poverty depends on increased agricultural productivity to raise rural incomes lower food prices and stimulate growth in other economic sectors Per capita agricultural production in sub Saharan Africa has fallen however for much of the past half century *Successes in African Agriculture* investigates how to reverse this decline Instead of cataloging failures as many past studies have done this book identifies episodes of successful agricultural growth in Africa and identifies processes practices and policies for accelerated growth in the future The individual studies follow developments in among other areas the farming of maize in East and Southern Africa cassava across the middle belt of Africa cotton in West Africa horticulture in Kenya and dairying in East Africa Drawing on these case studies and on consultations with agricultural specialists and politicians from across sub Saharan Africa undertaken in collaboration with the African Union s New Partnership for Africa s Development the contributors identify two key determinants of positive agricultural performance agricultural research to provide more productive and sustainable technologies to farmers and a policy framework that fosters market incentives for increasing production The contributors discuss how the public and private sectors can best coordinate the convergence of both factors Given current concerns about global food security this book provides timely and important resources to

policymakers and development specialists concerned with reversing the negative trends in food insecurity and poverty in Africa *Determinants of fertilizer and manure use for maize production in Kiambu District, Kenya* , **The Seed Industry for Dryland Crops in Eastern Kenya** , *Farmers' Maize Seed Systems in Western Oromia, Ethiopia* ,2001

Maize Production Environments Revisited A. D. Hartkamp,2001 This publication presents a GIS based approach for revising the definitions of global maize production environments called mega environments MEs used by CIMMYT and its partners A cluster analysis was performed on climate data representing a four month growing season for key maize producing locations Assuming rainfed production the onset of the growing season was determined based on the month when the ratio of precipitation over potential evapotranspiration exceeds 0.5 Diagnostic criteria for mapping MEs were based on cluster analysis results and expert knowledge The resulting maps can be used to select appropriate target environments for maize germplasm and trials as well as in priority setting and site selection for global maize breeding programs Atlas of Weed Mapping Hansjoerg Kraehmer,2016-03-17 Weeds are variously defined as plants growing where they are not wanted plants that interfere with human activity Weeds affect everyone in the world by reducing crop yield and quality delaying or interfering with harvesting interfering with animal feeding reducing animal health preventing water flow as plant parasites etc It is estimated that those problems cause billions worth of crop losses annually and the global cost of controlling weeds also runs into many billions every year Atlas of Weed Mapping presents an introductory overview on the occurrence of the most common weeds of the world The book notably includes Description of cropping practices and explanations for the global distribution of weeds Invasive plant mapping Aquatics and wetland plants with histological plant details Theoretical and practical aspects of weed mapping Aspects on the documentation of herbicide resistance Biodiversity rare weeds and the dominance of the most common weeds Fully illustrated with more than 800 coloured figures and a number of tables this new characterisation of anthropogenic vegetation will be interesting for readers of a great number of disciplines such as agriculture botany ecology geobotany and plant community research More than a hundred experts have contributed data to this unique compilation Crop Improvement Manjit S. Kang,2024-11-01 Learn to integrate molecular genetic techniques with traditional plant breeding methods This comprehensive book provides the latest authoritative scientific information on improvement of both temperate and tropical crops Crop Improvement Challenges in the Twenty First Century brings together expert plant breeders and geneticists to address issues related to crop adaptability and stability across environments for important food and fiber crops It emphasizes the need to integrate molecular genetic techniques with traditional plant breeding methods to develop hardier more productive crops Crop Improvement includes the latest research on physiological and biochemical responses of plants to drought and heat stress which should help breeders develop effective strategies for improving resistance to abiotic stresses In addition this helpful book elucidates the use of mixed models and best linear unbiased prediction To make the book comprehensive chapters discuss stability analysis in crop performance

trials and genotype by environment interactions Crop Improvement includes detailed information on breeding specific crops including rice tropical maize sorghum common bean sugar beet bananas and plantain cotton Crop Improvement offers both practical information and up to date research It also suggests a vision of new directions and partnerships that are expected to evolve in this century This book is an essential resource for practicing plant breeders and geneticists at universities government agencies and industry It should also be of use to teachers and students engaged in crop breeding
