Impersonals and other Agent Defocusing Constructions in French Michel Achard,2015-01-14 This book investigates French impersonals as a functional category Any structure whose agent is defocused and whose predicate describes a situation stable enough to be generally available should be considered impersonal In addition to il impersonals the category also includes demonstrative ce a middle se and indefinite on structures These different forms belong to the same functional category because they systematically code general and predictable events that cannot be imputed to a specific cause Because generality and predictability are gradual notions impersonals can only be identified within the context of specific constructional islands which therefore constitute the organizing principle of the French impersonal category Conducted in Cognitive Grammar the analysis follows the functional tradition in expanding the scope of French impersonals beyond il constructions but also proposes a way of precisely delineating the category This book will be of interest to anyone interested in impersonal constructions and French linguistics LaSalle and the Discovery of the Great West Francis Parkman,1898

G. S. Cain,Ken Robinson,2024-09-30 It is widely agreed that the period from 1625 to 1700 witnessed radical shifts in English life and thought For historians of politics science religion and philosophy it is a time when the intellectual bases of modern thought and modern institutions were in the process of formation divine monarchy gave way to contractual monarchy the truths of received authority gave way to those reached by inductive reasoning Although the year 1660 to some extent marks a turning point this comprehensive and fascinating book *Into Another Mould* originally published in 1992 demonstrates an underlying continuity within the period of Stuart rule It presents thinkers and writers before and after 1660 responding to similar dilemmas albeit with different attitudes methods and conclusions Central to this volume are the related concepts of authority and reason By looking at the changing attitudes to these two concepts in all spheres of life it examines the crucial developments of the period and their bearing on the literature Within this framework the authors examine social and political history religious belief and scientific knowledge and painting sculpture and architecture as contexts for the literature of the time This book will be a beneficial read for students and researchers of English literature history and cultural studies **The Work of Francis Parkman: La Salle and the discovery of the great West** Francis Parkman,1897
