Cardinal Directions

A **map** is a drawing of a real place. It shows the place as if you are looking at it from above. A map uses the directions of north, south, east, and west. These are called the **cardinal directions**. Look on the map for a direction marker. This marker is called a **compass rose**. It may have the abbreviations for all the cardinal directions: *N*, *S*, *E*, *W*. Or it may have only the abbreviation for north: *N*. If it has only the *N*, you have to remember how to find the other directions. Find the compass rose on the map below.

Face a wall map or hold the map below in front of you. Find north. It is toward the top of the map. South is the opposite of north, so it is toward the bottom of the map. East is toward the right side of the map. West is toward the left side.

One thing to remember is that north is **not** up. North is at the top of the map. But pretend that the map is lying flat on the ground. Now the compass rose points along the ground. North is a direction along the ground, not up in the air.

Directions

Study the map and the compass rose. Use them to answer the questions.

1. Is Deep River east or west of Willow? _____
2. Is Hogan north or south of Dixon? _____
3. Is Keyville east or west of Dixon? _____

Activity

Use your classroom map from page 7. Have your teacher help you to find north. Then, add a compass rose to your map.

diverse geography instruction and research experiences making it an authoritative publication on Japan's geography education system. The contribution of this book to the larger geography educational community is sharing the key strengths, concerns, and future of this school subject in English, where previously most publications were in Japanese. It will be a useful source for researchers and teachers to understand Japan's evolving geography instruction in the past, present, and future. The 21 chapters are organized into themes, beginning with an overview of the geography education system in Japan, followed by chapters that deal with regional geography and fieldwork, teacher training, geography education's contributions to society, and a comparative study of geography education across multiple countries. The book ends with a vision of geography education in the future.
