Marina Silva Defending Rainforest Communities In Brazil:

Marina Silva Ziporah Hildebrandt, 2001 A vital biography for young readers of a courageous Brazilian woman dedicated to saving the Amazon rainforest

Church, Cosmvision and the Environment Evan Berry, Robert Albrow, 2018-06-27 Though currently only partially understood evolving interactions among Latin American communities of faith governments and civil societies are a key feature of the popular mobilizations and policy debates about environmental issues in the region This edited collection describes and analyses multiple types of religious engagement with environmental concerns and conflicts seen in modern Latin American democracies This volume contributes to scholarship on the intersections of religion with environmental conflict in a number of ways Firstly it provides comparative analysis of the manner in which diverse religious actors are currently participating in transnational national and local advocacy in places such as Peru Argentina Brazil Bolivia Ecuador Guatemala and Mexico It also considers the diversity of an often plural religious engagement with advocacy including Catholic Evangelical and Pentecostal perspectives alongside the effects of indigenous cosmological ideas Finally this book explores the specific religious sources of seemingly unlikely new alliances and novel articulations of rights social justice and ethics for the environmental concerns of Latin America The relationship between religion and environmental issues is an increasingly important topic in the conversations around ecology and climate change This book is therefore a pertinent and topical work for any academic working in Religious Studies Environmental Studies and Latin American Studies

International Environmental Disputes Aaron Schwabach, 2005-12-13 This book offers an intensive investigation of past and present achievements and failures in international environmental law International Environmental Disputes is a thought provoking examination of the world's most pressing environmental problems and the attempts to remedy them through international law From the dumping of ash in the Danube and the disposal of waste in western Africa to the effects of the Everglades sugar industry the work explores such topics as the role of the United Nations the debate over sustainable development environmental ethics biopiracy and radioactive material in space satellites The book covers issues such as treaties on the ozone layer global climate change and the Kyoto protocol A chapter devoted to the United States discusses the international environmental impact of its economy Biographical sketches introduce readers to a diverse cast of characters including a New Guinea tribal elder and a Japanese TV personality

The Age of Ecology Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on

by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

Exceptional Women Environmentalists Frances Rooney,2007-01-01 From Rachel Carson the woman who started the modern environmental movement to Severn Cullis Suzuki former host of Suzuki s Nature Quest to Marina Silva who fights to keep the Brazilian rain forest from disappearing read about these ten amazing women who prove how ordinary people can do extraordinary things While the threat of environmental crises becomes more dominant in the media and popular culture these trailblazing women have taken action to make a vital difference for our planet **Chico Mendes** Alexa Murphy,2013

The life of Chico Mendes is the story of a humble rubber tapper who became an international hero because of his work to save the rain forest and improve the lives of those who have made a living caring for and working on it for *Integral Advantage* Ronnie Lessem,2017-05-15 The BRICS countries are heralded for their double digit economic growth rates and while this has indeed been impressive particularly in India and China it is clear that significant social and environmental fault lines have developed in these regions Building on the integral heritage of Ronnie Lessem s previous work through Trans4m s Centre for Integral Development here he makes the case for integral advantage a philosophy inclusive of nature and culture technology and economy altogether accommodated by an integral polity Moreover and as will be illustrated in each of the cases of the five BRICS countries each one is an integral entity in its own particular right and needs to be viewed and duly evolved as such In the final analysis he argues then that around the world the failure of a society to develop is not due to its economic limitations in isolation but to the failure of nature and culture technology and economy to co evolve in unison under the rubric of an integral polity altogether aligned with that particular society Drawing on the approach he has developed towards the release of a society s genius in each case he demonstrates how the pursuit of integral advantage may actually arise Most specifically he indicates how a balance between the spiritual and the material on the one hand and the natural and the social on the other needs to be achieved Women's Studies Quarterly Lee Quinby,2001-08 A timely and vital issue of this leading journal examines the impact of new technologies on the lives of women
