Names And Substance Of The Australian Subsection System:

Names and Substance in the Australian Subsection System Carl Georg Brandenstein, 1982-11 Structural analysis of subsection system as opposition between six basic physical or temperamental qualities constructs from this classification an Aboriginal World Order material drawn from many areas with an emphasis on north west Australia includes tribal index to contents *The Metamorphoses of Kinship* Maurice Godelier, 2012-03-03 With marriage in decline divorce on the rise the demise of the nuclear family and the increase in marriages and adoptions among same sex partners it is clear that the structures of kinship in the modern West are in a state of flux In *The Metamorphoses of Kinship* the world renowned anthropologist Maurice Godelier contextualizes these developments surveying the accumulated experience of humanity with regard to such phenomena as the organization of lines of descent sexuality and sexual prohibitions In parallel Godelier studies the evolution of Western conjugal and familial traditions from their roots in the nineteenth century to the present The conclusion he draws is that it is never the case that a man and a woman are sufficient on their own to raise a child and nowhere are relations of kinship or the family the keystone of society Godelier argues that the changes of the last thirty years do not herald the disappearance or death agony of kinship but rather its remarkable metamorphosis one that ironically is bringing us closer to the traditional societies studied by ethnologists **Social Anthropology and Australian Aboriginal Studies** Robert Tonks, Ronald Berndt, 1988-11 This volume summaries major developments in the social anthropology of Aboriginal studies in the 1960s 80s It is valuable as an overview of five important and interrelated topics economy kinship gender religion and law It also contains stimulating comment and criticism and raised important issues for future research as well as current debate in Aboriginal studies *The Comparative Method Reviewed* Mark Durie, Malcolm Ross, 1996-05-16 Historical reconstruction of languages relies on the comparative method which itself depends on the notion of the regularity of change The regularity of sound change is the famous Neogrammmarian Hypothesis sound change takes place according to laws that admit no exception The comparative method however is not restricted to the consideration of sound change and neither is the assumption of regularity Syntactic morphological and semantic change are all amenable in varying degrees to comparative reconstruction and each type of change is constrained in ways that enable the researcher to distinguish between regular and more irregular changes This volume draws together studies by scholars engaged in historical reconstruction all focussing on the subject of regularity and irregularity in the comparative method A wide range of languages are represented including Chinese Germanic and Austronesian **A - Airports** British Library, 2012-05-21 No detailed description available for A Airports *Attraction of Opposites* David Maybury-Lewis, Uri Almagor, 2025-10-01 The Attraction of Opposites considers a puzzling phenomenon Why do societies all over the world organize their social thought and institutions in patterns of opposites The essays collected in this volume examine contemporary societies throughout the world that organize their social theories or institutions in binary form Through analysis of these rich materials the distinguished contributors

explore the enduring human attraction to dualism They consider whether this is due to the natural twoness of things and if not why polarity should play such a prominent role in both ancient cosmologies and modern philosophies in early empires and in modern two party systems This study of dual organization tells us something important about human beings illuminating a mode of thought and social organization that has represented an attractive option throughout human history

Skin, Kin and Clan Patrick McConvell, Piers Kelly, Sébastien Lacrampe, 2018-04-01 Australia is unique in the world for its diverse and interlocking systems of Indigenous social organisation On no other continent do we see such an array of complex and contrasting social arrangements coordinated through a principle of universal kinship whereby two strangers meeting for the first time can recognise one another as kin For some time Australian kinship studies suffered from poor theorisation and insufficient aggregation of data The large scale AustKin project sought to redress these problems through the careful compilation of kinship information Arising from the project this book presents recent original research by a range of authors in the field on the kinship and social category systems in Australia A number of the contributions focus on reconstructing how these systems originated and developed over time Others are concerned with the relationship between kinship and land the semantics of kin terms and the dynamics of kin interactions *Sign Languages of Aboriginal Australia* Adam

Kendon, 1988 This 1988 book was the first full length study ever to be published on the subject of sign language as a means of communication among Australian Aborigines Based on fieldwork conducted over a span of nine years the volume presents a thorough analysis of the structure of sign languages and their relationship to spoken languages *The Languages and*

Linguistics of Australia Harold Koch, Rachel Nordlinger, 2014-08-19 *The Languages and Linguistics of Australia* A Comprehensive Guide is part of the multi volume reference work on the languages and linguistics of the continents of the world The volume provides a thorough overview of Australian languages including their linguistic structures their genetic relationships and issues of language maintenance and revitalisation Australian English Aboriginal English and other contact varieties are also discussed **Aboriginal Peoples and Birds in Australia** Philip A. Clarke, 2023-04-03 Australia is home

to many distinctive species of birds and Aboriginal peoples have developed close alliances with them over the millennia of their custodianship of this country *Aboriginal Peoples and Birds in Australia* Historical and Cultural Relationships provides a review of the broad physical historical and cultural relationships that Aboriginal people have had with the Australian avifauna This book aims to raise awareness of the alternative bodies of ornithological knowledge that reside outside of Western science It describes the role of birds as totemic ancestors and spirit beings and explores Aboriginal bird nomenclature foraging techniques and the use of avian materials to make food medicine and artefacts Through a historical perspective this book examines the gaps between knowledge systems of Indigenous peoples and Western science to encourage greater collaboration and acknowledgment in the future Cultural sensitivity Readers are warned that there may be words descriptions and terms used in this book that are culturally sensitive and which might not normally be used in certain public

or community contexts While this information may not reflect current understanding it is provided by the author in a historical context This publication may also contain quotations terms and annotations that reflect the historical attitude of the original author or that of the period in which the item was written and may be considered inappropriate today Aboriginal and Torres Strait Islander peoples are advised that this publication may contain the names and images of people who have passed away

Dictionary of Concepts in Cultural Anthropology Robert H. Winthrop, 1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated Robert Winthrop's dictionary describes the major concepts that have shaped the discipline both historically and theoretically It sets modern anthropology in its proper context within the broader intellectual tradition Eighty entries review the key concepts culture race nature symbolism adaptation the primitive etc that have established the fundamental problems and issues guided research and served as the focus for debate in key areas of the discipline The entries which range from 2 000 to 6 000 words in length are both thorough in treatment and contemporary in relevance Some entries are primarily of historical significance while others describe recent developments Each entry contains an annotated bibliography and a guide to additional reading on the subject While this is not primarily a technical lexicon many terms have been glossed and explained Designed to be useful to students of anthropology this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth

German Ethnography in Australia Nicolas Peterson, Anna Kenny, 2017-09-21 The contribution of German ethnography to Australian anthropological scholarship on Aboriginal societies and cultures has been limited primarily because few people working in the field read German But it has also been neglected because its humanistic concerns with language religion and mythology contrasted with the mainstream British social anthropological tradition that prevailed in Australia until the late 1960s The advent of native title claims which require drawing on the earliest ethnography for any area together with an increase in research on rock art of the Kimberley region has stimulated interest in this German ethnography as have some recent book translations Even so several major bodies of ethnography such as the 13 volumes on the cultures of northeastern South Australia and the seven volumes on the Aranda of the Alice Springs region remain inaccessible along with many ethnographically rich articles and reports in mission archives In 18 chapters this book introduces and reviews the significance of this neglected work much of it by missionaries who first wrote on Australian Aboriginal cultures in the 1840s Almost all of these German speakers in particular the missionaries learnt an Aboriginal language in order to be able to document religious beliefs mythology and songs as a first step to conversion As a result they produced an enormously valuable body of work that will greatly enrich regional ethnographies

Ecologies of Participation Zayin Cabot, 2018-04-30 In this daring debut Zayin Cabot challenges the wise homebodies of academia A profoundly interdisciplinary approach to comparative scholarship Ecologies of Participation offers a methodology whereby

we can face our shared planetary predicament It is grounded in process philosophy and asserts the importance of a new ontology of agency It traces the importance of L vy Bruhl and L vi Strauss s early work while offering new insight into the ontological turn in anthropology This book sets out to destabilize modern reductionist trends toward scientific materialism without falling into postmodern cultural constructivism It does not assume the givenness of nature or culture By advancing a multi ontology approach this work offers robust interventions into decolonial and critical studies Cabot takes contemporary scholarship in new and exciting directions offering an unstable ground from which to examine our shared worlds both human and other Throughout the last chapters of the book these threads are illuminated through a detailed ethics of comparison and participation

Blood Magic Thomas Buckley,Alma Gottlieb,2023-04-28 Examining cultures as diverse as long house dwellers in North Borneo African farmers Welsh housewives and postindustrial American workers this volume dramatically redefines the anthropological study of menstrual customs It challenges the widespread image of a universal menstrual taboo as well as the common assumption of universal female subordination which underlies it Contributing important new material and perspectives to our understanding of comparative gender politics and symbolism it is of particular importance to those interested in anthropology women s studies religion and comparative health systems Examining cultures as diverse as long house dwellers in North Borneo African farmers Welsh housewives and postindustrial American workers this volume dramatically redefines the anthropological study of menstrual customs It challenges the widespread i

The Composition of Worlds Philippe Descola,2023-10-18 In this autobiographical reflection the distinguished anthropologist Philippe Descola looks back on his intellectual career and examines both the central themes of his work and the key questions that have shaped anthropological debates over the past forty years A student of L vi Strauss Descola conducted ethnographic research among the Achuar of the upper Amazon in the late 1970s focusing on how native societies relate to their environment In this book he sheds fresh light on the evolution of his thinking from structuralism to an anthropology beyond the human on the critique of the modern separation between nature and society and above all on the genesis and scope of his major work Beyond Nature and Culture This synthesis of the ways in which humans view their relationships with non humans proposes four schemas for the composition of worlds animism naturalism totemism analogism that characterize our ways of inhabiting the earth Presented in the form of an extended conversation with Pierre Charbonnier this book is both a lucid introduction to the work of one of the most original anthropologists writing today and an impassioned plea for ontologies that are more accommodating of the diversity of beings

Sensing Disaster Dr. Matthew Lauer,2023-03-07 In 2007 a three story high tsunami slammed the small island of Simbo in the western Solomon Islands Drawing on over ten years of research Matthew Lauer provides a vivid and intimate account of this calamitous event and the tumultuous recovery

process His stimulating analysis surveys the unpredictable entanglements of the powerful waves with colonization capitalism human animal communication spirit beings ancestral territory and technoscientific expertise that shaped the disaster s outcomes Although the Simbo people had never experienced another tsunami in their lifetimes nearly everyone fled to safety before the destructive waves hit To understand their astonishing response Lauer argues that we need to rethink popular and scholarly portrayals of Indigenous knowledge to avert epistemic imperialism and improve disaster preparedness strategies In an increasingly disaster prone era of ecological crises this provocative book brings new possibilities into view for understanding the causes and consequences of calamity the unintended effects of humanitarian recovery and mitigation efforts and the nature of local knowledge

The Handbook of Contemporary Animism Graham Harvey,2014-09-11 The Handbook of Contemporary Animism brings together an international team of scholars to examine the full range of animist worldviews and practices The volume opens with an examination of recent approaches to animism This is followed by evaluations of ethnographic cognitive literary performative and material culture approaches as well as advances in activist and indigenous thinking about animism This handbook will be invaluable to students and scholars of Religion Sociology and Anthropology

Forms of the Visible Philippe Descola,2025-11-25 Imagery and figuration are not just figments of an artist s imagination Perception and imagination are always shaped by what habit has taught us to discern The visual path we spontaneously trace through the world depends on where we are situated in the four regions of the ontological archipelago animism naturalism totemism or analogism Each of these four regions corresponds to a way of conceiving the objects that make up the world of perceiving the continuities and discontinuities in the folds of the world and of drawing the dividing lines between humans and nonhumans From Alaskan Yup ik masks and Aboriginal bark paintings to miniature landscapes from the Song dynasty and Dutch Golden Age interior scenes each image reveals through what it shows or fails to show a certain figurative regime identifiable by the formal means it uses and by the device through which it can unleash its power to act The figurative regime enables us to grasp sometimes better than words can the contrasting ways of living that characterize the human condition and its relation to the nonhuman By comparing a great diversity of visual images and artworks Descola masterfully lays the theoretical foundations for an anthropology of figuration One of the world s leading anthropologists Philippe Descola has developed a comparative anthropology of relations between humans and nonhumans that has revolutionized both the human sciences and our ways of thinking about the great ecological issues of our time His new book will be of great value to students and scholars of anthropology visual art and art history and to anyone interested in art culture and the relations between the human and nonhuman worlds
