No Small Feat Taking Time For Change:

The Math We Need to Know and Do in Grades 6–9 Pearl Gold Solomon, 2007-05-24 Expertly connects state and national standards to examples from our curriculum With this text you can be sure that you are teaching what you are expected to teach Kimberly Puckett Math Teacher Tri Village Junior Senior High School New Madison OH An excellent practical and well organized resource for planning math lessons that address content standards found in all state curriculum frameworks Anne Roede Giddings Assistant Superintendent Ansonia Public Schools CT Does a wonderful job of connecting mathematical objectives with instructional techniques and real world applications Makes a valuable contribution to the field by integrating multiple resources and linking content and pedagogy Edward C Nolan Mathematics Department Chair Albert Einstein High School Kensington MD A simple to follow matrix helps you align activities problems and assessments with NCTM standards In a new edition of her standards based math workbook award winning author Pearl Gold Solomon covers essential concepts and skills as defined by the National Council of Teachers of Mathematics for learners in middle schools Designed as a comprehensive resource for planning curriculum instruction and assessment **The Math We Need to Know and Do in Grades 6–9 Second Edition** offers a quick reference simple to follow matrix covering the sequential and specific development of concepts across grade levels Responding to the current climate of accountability and new findings on how the brain works and how students learn this updated and expanded handbook covers content standards and provides guidelines for formal and informal assessments Teachers and instructional leaders will find practical tools that include Concept statements and scaffolds for building student understanding Suggestions for working with manipulatives calculators Web sites and educational software and graphics programs Ready to use sample activities problems and assessments Ideal for teachers as well as math coaches curriculum directors and assessment specialists this invaluable text presents authoritative and detailed guidance for strengthening curriculum development and instruction

The Math We Need to Know and Do in Grades PreK–5 Pearl Gold Solomon, 2006-06-14 I will be quoting many of the key points presented in the book often to others in my school Carol Amos Teacher Leader Mathematics Coordinator Twinfield Union School Plainfield VT A wonderful resource for readers who will be developing curriculum and lessons Each content branch is clearly explained and has examples for easy development Professionals will be able to easily build further examples Joseph DiGarbo Teacher Mohegan Elementary School Uncasville CT Makes a distinct contribution to the field of mathematics explaining in clear language the relevance of the various concepts as they apply to elementary mathematics curricula Melissa Miller Teacher Randall G Lynch Middle School Farmington AR Strengthen your math instruction and assessments with these standards based learner friendly tools This updated and expanded new edition provides elementary math teachers with a step by step approach to planning standards based curriculum instruction and now assessment too Pearl Gold Solomon covers the essential concepts and skills defined by the National Council of Teachers of Mathematics NCTM using a simple to

follow matrix that aligns activities and problems for the classroom with specific NCTM standards and then provides appropriate assessments for each. An essential handbook for grades PreK-5, it provides detailed guidance, sample activities, problems, and assessments all grade appropriate and ready to use. Highlights include a rubric, test specifications, other assessment resources, suggestions for working with manipulatives, calculators, educational software, and graphics programs, and Web sites. Teachers will find this invaluable when they review their own knowledge of mathematical concepts, plan curriculum for a specific lesson, grade level, or an entire school, respond to individual conceptual or procedural challenges among their learners, assess student knowledge both formally and informally. As always, Solomon turns confusing pedagogy into accessible instruction, giving new teachers clarity and experienced teachers a base that can easily be built upon. This is an indispensable resource for instructional leaders, district planners, staff developers, math coaches, and individual teachers seeking to enhance their instructional repertoire.

The Assessment Bridge Pearl G. Solomon, 2002-06-14. Just the kind of bridge we need to span the ideological wars and make schools work for teachers and their students. Ann Lieberman, Senior Scholar, Carnegie Foundation for the Advancement of Teaching, Visiting Professor, Stanford University. In her supremely well-written and useful book, Dr. Solomon has woven together historical perspective, research, and her own considerable experience to address reforming schools in the 21st Century. After defining the problem, productive change, Dr. Solomon has examined old solutions and conceptualized new ones to create better schools for students. Nancy Goldman, Director of Curriculum, Pearl River School District, Pearl River, NY. Standards and implementation of the learning process go hand in hand. The Assessment Bridge makes us clearly aware of the present need for a bridge between the two so that standards may not create greater failure and the rejection of formal education by many children. Matthew Foley, Pastor, Epiphany Roman Catholic Church. We must ensure that tests serve the needs of education, not force education to fulfill needs of test creators. The Assessment Bridge is award-winning educator Pearl Solomon's penetrating and cogent examination of today's high-stakes standards-based testing movement, which seems to compromise effective teaching and learning rather than improve it. Committed teachers know the importance of student assessment as a guide to classroom instruction. Restoring assessment to its proper place in the curriculum is the goal of this clear-headed analysis. Chapters cover: The origins and history of the current testing movement; How good tests guide teaching and learning; How to balance standardized tests, curriculum standards, and critical local variables such as class size, socioeconomic factors, and teacher attitudes; How to build bridges from test anxiety to improved student learning; teacher training; curriculum and instruction; and school administration and leadership. How to recruit, train, and nurture a new generation of talented, committed, and effective teachers. Emphasizing the positive at all times, Solomon guides us toward creation of better schools where the best teachers and school leaders link tests to standards, curriculum, and improved student learning.
