Reading Territory Kathryn Walkiewicz, 2023-03-09

The formation of new states was an essential feature of US expansion throughout the long nineteenth century, and debates over statehood and states' rights were waged not only in legislative assemblies but also in newspapers, maps, land surveys, and other forms of print and visual culture. Assessing these texts and archives, Kathryn Walkiewicz theorizes the logics of federalism and states' rights in the production of US empire, revealing how they were used to imagine states into existence while clashing with relational forms of territoriality asserted by Indigenous and Black people. Walkiewicz centers her analysis on statehood movements to create the places now called Georgia, Florida, Kansas, Cuba, and Oklahoma. In each case, she shows that Indigenous dispossession and anti-Blackness scaffolded the settler colonial project of establishing states' rights. But dissent and contestation by Indigenous and Black people imagined alternative paths, even as their exclusion and removal reshaped and renamed territory. By recovering this tension, Walkiewicz argues, we more fully understand the role of state-centered discourse as an expression of settler colonialism. We also come to see the possibilities for a territorial ethic that insists on thinking beyond the boundaries of the state.
