Osnovy Politologii Uchebnoe Posobie:

Elites in Transition Heinrich Best,Ulrike Becker,2013-11-11 Who rules in Eastern Europe became a fundamental question for western researchers and other observers after communist regimes were established in the region and it gained further importance as state socialism expanded into Central Europe after the Second World War A political order which according to Leninist theory of the state and to subsequent Stalinist political practice was primarily a highly centralised and repressive power organisation directed as if it were natural researchers attention towards the highest echelon of office holders in party and state Extreme centralisation of power in these regimes was consequently linked to an elitist approach to analysing them from a distant viewpoint It is one of the many paradoxes of state socialism that a social and political order which presumptuously claimed to be the final destination of historical development and to be based on deterministic laws of social evolution which claimed an egalitarian nature and denied the significance of the individual was perceived through the idiosyncrasies rivalries and personal traits of its rulers The largest part of these societies remained in grey obscurity only occasionally revealing bits of valid information about a social life distant from the centres of power It is debatable whether this top headedness of western research into communist societies created a completely distorted picture of reality however it certainly contributed to an overestimation of the stability of these regimes an underestimation of their factual diversity and a misjudgement of the extent of conflicts and cleavages dividing them
