## **Other Cultures Elder Years An Introduction To Cultural Gerontology:**

**Other Cultures, Elder Years** Ellen Rhoads Holmes, Lowell D. Holmes, 1995-05-24 Holmes and Holmes have revised their 1983 book and it remains a good supplement for an undergraduate gerontology course or anthropology course. It is written at a readable level; each chapter has a clear summary. It provides an excellent summary of secondary sources, avoiding extensive review of primary research, complicated theory, and methodological issues. Clinical Gerontologist Hailed as extremely well organized, balanced, and impartial in its first edition by The Gerontologist, *Other Cultures Elder Years* is once again available in a fully revamped second edition. This new edition provides a comprehensive comparative viewpoint on our knowledge about worldwide patterns of aging. It addresses everything from demographic patterns to family relations, from perceptions of the life cycle to the impact of modernization on the aged. Replete with summaries of crucial studies from various parts of the world, *Other Cultures Elder Years* also offers three extended case descriptions of Inuit, Samoan, and white American aged, as well as an examination of aging patterns among major American ethnic groups. Among the other subjects the text addresses are cultural perspectives in health care, the future of aging in America, and creativity and the life cycle. *Other Cultures Elder Years* is the key text available for use by anyone teaching courses on aging and culture. I found the current book a significant improvement over the first edition. It remains to be the only usable text in the anthropology of aging available. I see the audiences for the book as instructors for the following courses: Anthropology of Aging, Sociology of Aging, and general social gerontology courses. I have used this book in past Anthropology of Aging courses and would do so again. Jay Sokolovsky, University of Maryland, Baltimore County. This book does a truly artful job of organizing and presenting the complex diversity of human experience related to aging and cultural influence. This book offers an implicit biocultural laboratory to the reader: the biologic universal of human aging is shaped by the prism of cultural influence. The reader is guided through the evolutionary history of aging among anthropoid primates to hominids to *Homo sapiens sapiens*, who are then examined from cultural perspectives found around the globe. The effect is one of inquiry, search, synthesis, and ultimately a confrontation with our inner selves as we negotiate the inexorable march toward our ultimate destiny. J. Neil Henderson, Suncoast Gerontology Center, University of South Florida.

**The Elderly as Modern Pioneers** Philip Silverman, 1987 Overall one of the most competent and well-presented treatments of the subject now available. Jay Sokolovsky, University of Maryland. A valuable contribution to the field of gerontology. The volume combines interdisciplinary and cross-cultural perspectives written in a well-organized framework without sacrificing depth and comprehensive summary of gerontological research. Clinical Gerontologist. A well-written and documented volume for persons interested in the anthropological viewpoint on aging. Choice. The use of cross-cultural comparisons provides a broadened perspective to understanding the issues of aging. Current Literature on Aging. It is comprehensive, well-written, mercifully jargon-free, critical, and controversial and undogmatic. Aging and Society. This volume focuses on the nature and problems of old age, providing a comprehensive summary of current

gerontological research from interdisciplinary and cross cultural perspectives Cross-cultural Communication and Aging in the United States Hana Noor Al-Deen, 2013-10-18 Recently the communication discipline has devoted increasing energy toward the study of aging yet most of the research has insufficiently addressed a crucial factor in communicative relationships culture Meanwhile cross cultural intercultural communication has not adequately addressed the aging process Combining three powerful elements communication aging and culture all of which have an increasingly profound impact on today s multicultural society this book focuses on older Americans in various communicative contexts within the framework of their cultures Composed of original research by experts in their respective fields the book combines communication aging and culture for a unique examination of those elements in American society Section 1 deals with perspectives in cross cultural communication and aging These perspectives both illustrate the issues that greatly affect the lives of our elders and suggest ways to improve their status Section 2 showcases three American co cultures Hawaiian Arab and Mormon illustrate how language attitudes and mentoring can serve as the links for maintaining cross generational continuity in multicultural society Section 3 demonstrates that many American organizations frequently contribute to the hardships that both internal elder customers employees and external elder customers residents and patients must endure Section 4 incorporates popular culture and aging It presents the role of selective popular media in portraying our elders Because Americans rely heavily on the media their mediated perceptions can have a profound impact on their attitudes toward the older population Designed as a reader or supplementary text for college students in communication gerontology anthropology sociology and other related fields this text can also be used by professionals in gerontological service areas by libraries and as a personal reference It offers extensive appendices figures and tables for additional reference **Experiencing Old Age in Ancient Rome** Karen Cokayne, 2013-01-11 Old age today is a contentious topic It can be seen as a demographic timebomb or as a resource of wisdom and experience to be valued and exploited There is frequent debate over how we value the elderly and whether ageing is an affliction to be treated or a natural process to be embraced Karen Cokayne explores how ancient Rome dealt with the physical intellectual and emotional implications of the ageing process and asks how the Romans themselves experienced and responded to old age Drawing on a wide range of contemporary material written sources inscriptions and visual evidence the study brings into focus universal concerns including geriatric illness memory loss and senility the status and role of the old sexuality and family relationships The book s unique emphasis on both the individual and society s responses to ageing makes it a valuable contribution to the study of the social history of Rome **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1993 Aging In Post-mao China Ada Elizabeth Sher, 2019-04-16 This case study of Shenyang the industrial capital of Liaoning Province explores what it means to be old in the People s Republic of China especially in terms of religious and ethical traditions education health and current political economic and employment trends Aging Parents, Ambivalent Baby Boomers Jayne E.
