Eason, 2017-03-06 For the past fifty years America has been extraordinarily busy building prisons Since 1970 we have tripled the total number of facilities adding more than 1 200 new prisons to the landscape This building boom has taken place across the country but is largely concentrated in rural southern towns In 2007 John M Eason moved his family to Forrest City Arkansas in search of answers to key questions about this trend Why is America building so many prisons Why now And why in rural areas Eason quickly learned that rural demand for prisons is complicated Towns like Forrest City choose to build prisons not simply in hopes of landing jobs or economic wellbeing but also to protect and improve their reputations For some rural leaders fostering a prison in their town is a means of achieving order in a rapidly changing world Taking us into the decision making meetings and tracking the impact of prisons on economic development poverty and race Eason demonstrates how groups of elite whites and black leaders share power Situating prisons within dynamic shifts that rural economies are undergoing and showing how racially diverse communities lobby for prison construction *Big House on the Prairie* is a remarkable glimpse into the ways a prison economy takes shape and operates [Encyclopedia of Environment and Society](#)

The Five Towns Leslie Tonner, 2015-05-05 Set against the backdrop of post World War II America this sweeping novel follows three very different families as they search for love and fulfillment in Long Island's fabled gilded ghetto the Five Towns In 1950 the Five Towns are a burgeoning suburban destination for those in search of a better life Arthur Freundlich is one of those pioneers With the recent influx of Jews to Long Island the former GI has relocated his mother pregnant wife and three year old daughter from a tiny apartment in Queens to a split level house in Cedarhurst a world apart from the cramped quarters of Brooklyn and Queens that Arthur knew In his wealthy insulated corner of this formerly WASP y small town community Harvard educated John Dodge lives with his wife and their son Christopher who causes a scandal when he falls in love with beautiful Jewish Melanie Miller A black woman struggling to raise her family in turbulent times Lulu Pearce leaves blue collar Inwood every morning to work as a maid in middle class homes in Woodmere But an unwanted pregnancy could forever alter the course of her future As America comes of age these three families battle bigotry racism and dramatically changing mores in one of Long Island's most famous suburban enclaves *Endangered Spaces, Enduring Places* Janet M. Fitchen, 2019-04-02 Rural America as a place and a way of life is undergoing major transformation The farm crisis and the decline of manufacturing dealt a double blow to the rural economy in the 1980s Rural communities continue to lose farms factories and young people Rural lands are increasingly being sought as places for vacation homes state prisons and waste dumps Rural people are ambivalent about new residents and activities that are coming in and unsure of their own rural identity Old assumptions about rural life and rural community are now open to question Based on years of field observations

and hundreds of interviews in fifteen rural counties in upstate New York Fitchen's book explores these interconnected changes It describes the financial stress in dairy farming and the efforts families made to hold onto their farms It records the stunned disbelief and difficult adjustment of rural factory workers and small communities as local plants shut down The author chronicles the struggles of communities plagued by toxic chemicals in their drinking water and of young families slipping farther into poverty She reports on some communities that are campaigning to win a state prison and others that are protesting against a proposed radioactive waste dump The book illustrates the persistence of rural ingenuity and determination but argues that these alone cannot solve the problems of rural America A well informed federal and state commitment is necessary With policies and programs appropriate for rural situations most communities could adapt creatively to the changes integrate around a new rural identity and survive into the twenty first century as enduring social settings for their residents Rural Cooperatives, 2011 *Federal Probation*, 1987 Bloomsbury Good Reading Guide Nick Rennison, 2009-11-23 Deciding what to read next when you've just finished an unputdownable novel can be a daunting task The Bloomsbury Good Reading Guide features hundreds of authors and thousands of titles with navigation features to lead you on a rich journey through some of the best literature to grace our shelves *Clearinghouse Review*, 1995

Garbage Wars David Naguib Pellow, 2004-09-17 A study of the struggle for environmental justice focusing on conflicts over solid waste and pollution in Chicago In *Garbage Wars* the sociologist David Pellow describes the politics of garbage in Chicago He shows how garbage affects residents in vulnerable communities and poses health risks to those who dispose of it He follows the trash the pollution the hazards and the people who encountered them in the period 1880-2000 What unfolds is a tug of war among social movements government and industry over how we manage our waste who benefits and who pays the costs Studies demonstrate that minority and low income communities bear a disproportionate burden of environmental hazards Pellow analyzes how and why environmental inequalities are created He also explains how class and racial politics have influenced the waste industry throughout the history of Chicago and the United States After examining the roles of social movements and workers in defining resisting and shaping garbage disposal in the United States he concludes that some environmental groups and people of color have actually contributed to environmental inequality By highlighting conflicts over waste dumping incineration landfills and recycling Pellow provides a historical view of the garbage industry throughout the life cycle of waste Although his focus is on Chicago he places the trends and conflicts in a broader context

describing how communities throughout the United States have resisted the waste industry's efforts to locate hazardous facilities in their backyards. The book closes with suggestions for how communities can work more effectively for environmental justice and safe sustainable waste management.

Trends in Social Cohesion Council of Europe, 2012-01-01 We are at a point in history where economic inequalities are more widespread each day. The situation of extreme poverty experienced by the majority of the populations in developing countries Third World countries often coincides with an absence of democracy and the violation of the most fundamental rights. But in so called First World countries a non negligible proportion of inhabitants also live in impoverished conditions albeit mainly relative poverty and are denied their rights. The European situation which this publication aims to analyse is painful the entire continent is afflicted by increasing poverty and consequently by the erosion of living conditions and social conflicts. The economic and financial crisis has resulted in the loss of millions of jobs and created job insecurity for many still working. Economic insecurity raises social tensions aggravating xenophobia for instance. Yet the economic and financial crisis could present a good opportunity to rethink the economic and social system as a whole. Indeed poverty in modern societies has never been purely a question of lack of wealth. It is therefore urgent today to devise a new discourse on poverty. In pursuit of this goal the Council of Europe is following up this publication in the framework of the project Human rights of people experiencing
